Join the club!

Just sign-up for a full year of club benefits for $15, and get 12 issues of Nintendo Power Magazine!

Way more than a subscription!

There's nothing like Nintendo Power: Super Power Club—we've taken all the best parts of Nintendo Power Magazine, and Super-charged them to give you more playing power than ever before! Just look at everything you get!

Nintendo Power Subscription—Membership includes your monthly Nintendo Power magazine. Every month you'll get tips, strategies, full-color maps and reviews for all 3 Nintendo systems, straight from the pros at Nintendo.

Power Certificates—A full year gets you $36 in exclusive Power Certificates to help you get the hottest game paks at reduced prices.

Power Trading Cards—Every month you'll get six Power Trading Cards—they feature stats and challenges for your favorite games. You can even win a FREE game pak!

Super Power Issue—Coming every January, this members-only issue is a year-end look at Nintendo's best and it's packed with exclusive stuff that won't be available in stores.

Power Cleaning Service—Get the most power out of your Nintendo system with a free cleaning at your participating official Nintendo World Class Service® Center.

Join NOW and choose your FREE Player's Guide!

Get the Player's Guide of your choice with your paid membership—a $15 value!

NES Game Atlas (code 1003) — featuring complete maps for 18 best-selling classic games! 180 pages of must-have info for the serious player!

Mario Mania (code 1004) — including over 100 pages about his new 16-bit adventure, Super Mario World. Plus fascinating details, graphics and more about the original video super hero.

Game Boy (code 1005) — packed with in-depth reviews on over 25 top titles including ultra hot power tips, strategies, maps and more! 180 pages of vital info to unleash the full potential of your Game Boy!

Super NES (code 1006) — filled with tips, maps and tricks for the incredible new line-up of 16-bit game paks that await your skills and stamina.

Zelda (code 1007) — 170 pages for Link fans, including the latest tips, maps and tricks for the incredible 16-bit The Legend of Zelda. A Link to the Past for your Super NES system!

CALL 1-800-255-3700 FOR INSTANT MEMBERSHIP!

Order by VISA or MasterCard. Call Mon.-Sat. 4 a.m. to 12 midnight Pacific Standard Time (PST). Sunday 8 a.m. to 7 p.m. (The Nintendo representative will need to speak to the person whose name appears on the credit card.)

I just had to write and tell you how pleased I am with Mario Paint. I am a parent and although my children have a zillion games, this is the first thing that really pleases me. Mario Paint is creative and imaginative. It has great color and sound. I actually feel my children are doing something “constructive” when they use it. In fact, I think it’s SUPER NINTENDO. Thanks for making it!

Luanne Gabriel
Marinette, WI

Thanks Luanne and Blair! We think it’s great that Mario Paint is getting such a warm reception from Super NES owners. It’s a very powerful and creative program. In fact, we thought it was so great—we gave it 16 more pages of coverage in this month’s “subscribers only” Super Issue. Enjoy!

Mario Simeone from Levittown, PA created this stained glass window of a famous Nintendo character with whom he just happens to share first names.

Andrea Gervais’ cat, Coonie, has great taste in magazines! Coonie purrs over the pages of Power every month with Andrea at home in Auburn, Maine.

We really enjoy thinking up contests for the Player’s Poll every month, but maybe you can help us out. What kind of a Player’s Poll contest would YOU like to see? Give us the details. How many and what type of prizes would you award? Where would you travel to? Who knows, we may take you up on your idea!
It doesn't really matter how many free games Josh Mendenhall can rack up on the new Super Mario Bros. pinball game. He can play for free for as long as he wants! He owns it! The Grand Prize from the Player's Poll Contest in Volume 38 was shipped directly from the Premier factory in Illinois to Josh's home in Alta Loma, California. It now resides in Josh's bedroom.

The Super Mario Bros. pinball machine should be a big hit with pinball gamers everywhere. Look for it in an arcade, bowling alley or wherever you play pinball. (Better yet, just go over to Josh's house!)

EDITOR'S CORNER
The flood of great stuff from Nintendo Power keeps coming your way! The jam-packed January '93 Super Issue is finally in your hands. You'll notice that we've changed the format of the magazine just a bit. Several new design elements have been added to make finding vital information easier. Also, to support the immense popularity of the Super NES, the NES and the Super NES game reviews have swapped locations. As always, please let us know how you like the changes. With this issue, we bid farewell to George & Rob's opinions in Now Playing. George Snifeld has joined Howard Phillips, Nintendo's former Game Master, at T*HQ. Good luck, George!

PLUTO IS MISSING!

An innocent game of catch turns sour when Mickey discovers his dog, Pluto, is missing. Where could he be? He doesn't usually run off like this! Could this dastardly deed be the doings of the evil Emperor Pete? In desperation, Mickey sets off through Emperor Pete's kingdom. Mickey makes no bones about it, he's scared. However, the mystery surrounding Pluto's disappearance pushes him to undergo the test of the Magical Quest. Once again, Capcom is serving up a gaming extravaganza! The Magical Quest is filled to the brim with eye and ear candy. The only drawback is that the game is just too short—we wish it were much longer.

PETE'S KINGDOM

The journey through Pete's Kingdom will be filled with all sorts of hazards. Luckily, Mickey is no regular field mouse! He's extremely agile, fairly quick, adept at jumping and capable of stopping on a dime. He'll need all of these qualities as well as the help of some specially-crafted outfits that he'll find and be given along the way. Study the map to see where Mickey's journey will take him. From the Treetops all the way to Pete's Castle, The Magical Quest is guaranteed to be a workout for Mickey.

AN ADVENTURER'S MAP

3. FIRE GROTTO (page 14)
4. PETE'S PEAK (page 16)
5. SNOWY VALLEY (page 18)
6. PETE'S CASTLE (poster)
SUITS 'N STUFF

DRAW THE CURTAIN

Mickey will be awarded three different costumes that enable him to perform magic, fight fires and climb mountains. Press the R or L Buttons to highlight the desired costume in the Costume Box and then press the A Button to send him to the dressing room.

SPECIAL ITEMS

It's imperative that Mickey make good use of the items available to him. Study the maps to locate the hidden items.

"Ah, secure me! I have to put on my Magic Turban!"

Brave is he who wears the Firefighter's costume. It takes a mighty mouse to fight the Fire Grotto Blazes.

VOLUME 44 9
A lush vineyard is the setting for Treetops. Right from the start, the quality of the game's graphics will no doubt please you. Grab the giant red cherries and spin them as they rise upward, grab them again and go for a ride!

**STAGE 1-1**

**RIDE THE TOMATO**
Once Mickey stands on the tomato, it will break loose and start to roll.

Keep Mickey moving left to stay on top of the tomato at all times.

**SECRET AREA IN THE CLOUDS**
Mickey will see some Golden Blocks as he exits through the window on the right side of the house. Don't grab them—use them as steps. The entrance to a secret area is on the roof.

**STAGE 1-2**

**SECRET SHOP**
It's tricky to get to this secret shop. Mickey has to ride the tomato all the way down the steep vine, jump off and then up to the Gray Block to get on top of the trees.

**THE FIRST BATTLE**
When this ugly, winged creep swoops down to attack, jump up and stomp on his fat head. Mickey can also stomp on the smaller creatures that the mini-boss releases and then throw them right back at him. Be patient with this one.

10 NINTENDO POWER
THE BEAVER'S STASH

This busy beaver is hiding something! Use one of the Golden Blocks to take the territorial beaver out of commission and then walk through his dam to score a 2-Up.

IT'S MICKEY!

Mickey, shown here in his normal state, can run, jump, grab and spin certain objects like Blocks. Sometimes, valuable Coins will appear if Mickey grabs Golden Blocks. If Mickey stumps the head of certain enemies, he can pick up the creatures and send them spinning, too.

HEART CONTAINER

Quite possibly, the most important item in the game is the Heart Container. Be sure not to bypass this easily-accessed Treasure Box. Jump up and grab the ring on the box to release the treasure.

SNAAKEY

Uh-oh, Mickey stumbles upon a giant, hungry-looking snake. The snake will chase Mickey from one side of the screen to the other. Grab a reappearing Red Block and toss it at his big head. Mickey can jump on the snake's head as well as chuck the separated snake segments.
The ominous Dark Forest is summoning Mickey. There’s no avoiding it—one way or another, he’ll have to go through it. As a reward for his progress so far, Mickey will be awarded the Magic Turban at the beginning of the stage.

**SECRET ROOM**
Clear away the Golden Blocks in this hard-to-reach area then drop down to the door to enter a secret room. A Heart Container is located in the Treasure Box here.

**TROUBLE IN THE FOREST**
Use fully charged magic blasts to defeat this chubby, but mobile, mini-boss. Watch out for the spiked pods he tosses. He launches his skirt, too.

**SHOOT THE TRAP**
This giant tree is filled with some sort of strange fluid. Mickey will have to wear his Magic Turban to make it through. The “gates” that block Mickey from progressing can be opened with a blast of magic. Defeat the crabs in the same manner.

**SECRET SHOP**
Intuitively speaking, this Item Shop is not easy to locate. However, all Mickey has to do to reach it is jump off the edge of the branch and fall down to the entrance. Buy goodies here.
**BRANCH BOOST**

After Mickey charges up his magic and nukes these peanut-shaped enemies, he can bounce on the pointed end of the branches to reach other branches or Blocks to step on. Jump on the very end to get the most height.

**RIDE THE LEAVES**

Mickey will show off his jumping ability as he tries to make it over the giant gap by jumping from leaf to leaf. Don't try to jump to another leaf if it is moving away from Mickey. Wait until it's drifting back his way.

**MICKEY THE WIZARD**

Donning the Magic Turban, Mickey can summon the powers of magic. Press, hold and release the Y Button to fire off a burst of magic power.

**STUMP THUMPERS**

The Stump Thumpers hold giant clubs and they swing them up and down with great force. If Mickey is hit by a club, he will lose a Heart from his Health Meter. Depending on where the club is, walk under or jump over it.

**WHAT’S IN THE MUCK?**

In the Easy Mode, Mickey is safe in the murky water, but in the Normal and Hard Modes, a giant fish will patrol the depths in search of stray mice.

**ARACHNOPHOBIA!**

As soon as the spider enters the screen, nail it with a blast of magic. Jumping on its head is very effective in Mickey’s attempt to defeat the arachnid beast.
Going down! Things really heat up in the Fire Grotto. Mickey will be forced into more tricky situations where he'll have to come up with new strategies to come on top. Firefighter Mickey will handle most of the chores here.

**WORK QUICKLY!**
The platform is going down—and so is the spiked ceiling! Clear off the Golden Blocks quickly so Mickey can continue downward and escape the wrath of the deadly spikes.

**UPPER ROOM**
By positioning certain Blocks, Mickey can jump up and make his way to this stack of Golden Blocks which hides a door.

**HIDDEN ROOM FOUND!**
By pushing this Block over and under the ledge, Mickey can ride it down, blast away the Golden Blocks and enter a hidden room. Find more Coins inside a Treasure Box there.

**FIREFIGHTER MICKEY**
As Mickey enters the Fire Grotto, the Firefighter's Costume is waiting. Mickey can put out small fires and move Blocks of all sizes with it. Check out Mickey's face. He gets the job done!

**HAMMERED!**
This mini-boss carries a big hammer. With it, he can cause a section of the floor where Mickey is standing to rise up to the spiked ceiling. Don't stand in one spot—keep moving! Charge up some hefty blasts of magic to do him in. Be careful not to shoot when he jumps.
UP THROUGH THE FIRE
The moving platform which Mickey jumps to in the first photo will take him up through a gap in the immense wall of flame to a Treasure Box full of Coins. Blast the box with water to crack it open.

INTO THE FIRE
When the vertically-moving platforms enter the flames below, they will immediately catch fire. Squirt them with a small amount of water before hopping on them. Jump off before they enter the flames again.

SECRET SHOP
Study this tricky maze of Blocks to find a way to move them into position and allow Mickey to make it up to a secret Item Shop.

DIVE!
The bubble around Magic Mickey's head allows him to stay underwater. A valuable Heart Container can be found in this particular Treasure Box. Mickey's magic power works great under the water, too!

HOTHEAD
Squirt this boss with as much water as you can, but don't waste it! Duck down when the rotation of the platforms takes Mickey under the boss and then shoot water from the other side.
Goofy meets Mickey at the beginning of this windy stage and helps him out by presenting him with a brand new climber's outfit. A grappling hook and rope will be Mickey's main means of survival in this steep, rocky terrain.

**GRAPPLING WITH A 1-UP**
By latching on to this floating platform, Mickey can pull himself up and over to an elusive 1-Up. Mickey may have to jump up and out before deploying the grappling hook. A dangerous move.

**SECRET SHOP**
Only by bouncing off one of the eggs can Mickey get up to the Golden Blocks and then on to a hidden Item Shop. Trying to use the grappling hook will only result in the elimination of the Golden Blocks. He has to jump!

**WINDFALLS**
The wind really whips down through the gaps in the rocks on the Peak. Mickey is able to hear when the wind is about to blow. Don't cross the gaps until it stops.

**FOR BRAVE ADVENTURERS ONLY!**
If Mickey falls down through a gap and then uses the hook to grapple along to this secret area, he'll be rewarded with a Heart Container.
**THE MOUNTAINEER MOUSE**

Mickey can throw the grappling hook out in five different directions. It will latch on to most surfaces, allowing Mickey to cross gaps and to pull himself up to heights otherwise unattainable. He can also use the hook to stun enemies and take their protection away.

---

**DON'T FALL**

As is the case with most spikes, a fall onto the spikes in this area will hurt! Swing Mickey out as far to the right as he can go after the grappling hook has been attached to the floating grapple points.

---

**FROM DOWN UNDER**

Mickey can make his way to the right if he falls down any of the gaps. The floating platforms make it relatively easy to get back to the exit. Don't go to this area unless you're a very experienced climber!

---

**BAD BIRD BOSS**

This bad bird will swoop in from a distance. The force of the wind will knock Mickey off the nest. Use the hook to hang on to the Mickey symbol and you won't be blown off! Quickly switch to the Turban and nail the bird in the head with a blast of magic when it drops down with its egg.
The Ren and Stimpy Show for Game Boy will be here any day now from T*HQ Games. Happy Happy! Joy Joy!
The slippery surfaces of the Snowy Valley will challenge the footwork skills of even the bravest adventurer. There are sections where it will pay to speed through, but other sections require caution and a bit of restraint.

**SLIPPERY SLIDE**
Mickey can take off running at high speed when he's going down a hill. More speed will allow him to jump farther and will become more important later in the stage.

**LEAP THE GAP**
This is where it's important to be fast. He won't be able to clear the long gap if he isn't moving at top speed. Concentrate on the timing of the jump. If he runs and jumps too soon, he might not make it.

**ANOTHER ICE STEP**
A lone Treasure Box can be reached by squirting this ice block and then jumping out to it. Fire a steady stream at the Treasure Box to release the prize.

**WHAT'S UP? A 1-UP**
If Mickey shoots the hexagonal ice blocks with enough water, an ice ledge will form for a few seconds. Jump up and shoot the next one to create steps. If Mickey is quick enough, he'll make it up to a Treasure Box that holds a 1-Up.

**BERRY BOINGERS**
BOING!!! These flexible posts that resemble raspberries will stop Mickey and push him back if he runs into them. Just jump over them to avoid their spring-like effect. They will also stop and send the Ice Sleds back the other way.

**Charge!** Mickey zooms down the hill and takes a leap across the dangerous chasm. Will he make it?
A mah-jongg set includes 144 tiles etched with Chinese symbols. Shanghai II also gives you the option of using tiles that have symbols of different themes, such as traffic signs, international flags, numbers and animals. Some tile sets are easier to see than others. Regardless of the tile set you choose, the object of the game is to remove all tiles from the layout by matching like pairs. In Shanghai, the tiles are laid out in one of 13 patterns. In Dragon's Eye, the layout grid is a dragon's shape.

Activision's new version of the traditional Chinese game, mah-jongg, is coming soon to the Super NES, along with Dragon's Eye, which pits Master against Slayer. The symbols on some tiles are difficult to see, but avid mah-jongg players will like both games.
Shanghai II lets you choose the traditional Shanghai layout or one of the 12 other layouts that form the shapes of the animals that represent the different signs of the Chinese zodiac. Some of the layouts are more difficult than others because they have more blocked tiles to start with. The easiest layouts are the Boar, the Dragon, the Monkey and the Snake. More advanced are Shanghai, the Dog, the Ram and the Rooster Master layouts include the Horse, the Ox, the Rabbit and the Tiger. Whichever layout you choose, start by removing the tiles that block the most moves. A tile is "clear" if nothing is on top of it and if you can slide it out either to the left or to the right. It's always a good idea to plan several moves ahead.

### What Year Are You?

Many Chinese believe that the year you were born in determines your personality traits and your likelihood of attaining success and happiness in your lifetime. Their zodiac system is based on a 12-year cycle, and each year within the cycle is named after an animal that they feel represents the characteristics of that year. Look at the chart below to see which animal represents you.

<table>
<thead>
<tr>
<th>Animal</th>
<th>Year Range</th>
</tr>
</thead>
</table>

### Meet Your Match

1. This is the Shanghai layout with the traditional Chinese mahjong tiles. Study the board and look for matches before you begin. There are two sets of Bamboo tiles 1-9. Dot tiles 1-9, Chinese Character tiles 1-9, two tiles for each of the four winds, one for each of the four seasons and one for each of four flowers and three pairs of Dragons. Any two seasons match up and any two flowers form a pair but the rest of the tiles must match exactly.

2. Plan ahead. The 1 in the center can be paired with either the 1 on the right or the 1 on the left. The 1 on the right is blocking more tiles than the 1 on the left, so move it first.

3. If you run out of moves, you can access Help and either BackUp a move to try something different or Shuffle the remaining tiles and hope it results in new moves.

4. If you end up with tiles arranged as they are in the upper left photo, you've hit a dead end. The seven which you need to clear the King must under the queen, and you can't move the queen until you move the seven. If you Shuffle and clear the board, you'll see Chinese characters that read "Congratulations."
DRAGON'S EYE

The Dragon's Eye board is shaped like a dragon. A Master, who holds three tiles, plays against a Slayer holding six tiles. The Master tries to cover the dragon's body, beginning with its heart, and the Slayer tries to uncover the dragon by matching and removing tiles. A single player can choose either role and challenge the computer, or two players can choose their roles and compete against each other. The Master earns points when tiles are placed on the board; the Slayer scores when tiles are removed.

SLAY THE DRAGON

1. When tiles are covered on two sides, they automatically flip over. Put tiles on the dragon's limbs (the six spaces on the outside) first, where they can't flip.

2. You must have one empty space in your hand when you end your turn. If you have fewer than five tiles in your hand, you can draw a tile from the pile. Keep matching so you can draw as many tiles as possible.

3. If you have a pair in your hand, discard one of them to one of the dragon's limbs. That way, when it's your turn again no matter what you're dealt, you'll be sure to have a play.

PAIR UP TO PLAY

Both Shanghai and Dragon's Eye have fun two-player versions. In two-player Shanghai, speed counts. The clock starts ticking when each player's turn starts, and the longer it takes to find a match, the lower the score. Total times are tallied when the board is cleared and the fastest player wins. In two-player Dragon's Eye, one player is the Master, the other the Slayer.

PUT DOWN NEW TILE

The one downside of Shanghai II is that some of the symbols on the tiles—especially the Chinese characters—are hard to read, but you can change from standard mahjongg symbols to some that you might find easier to recognize.

- **Flags**: You can change to tiles with international flags, but the differences in some countries' designs are very subtle.
- **Animals**: Select the animal tiles and match penguins to penguins, pelicans to pelicans. And be sure to turn the sound up!
- **Vegetables**: You don't like beans? Get your daily dose of vegetables the easy way! Pick the vegetable tiles—they're an easy set to see.
Wherever crime and destruction raise their ugly heads, Sonic Blast Man will be there to champion the cause of justice. Blasting bad guys with his multi-megaton punch isn't this hero's only job. He must save civilians from runaway trucks, collapsing buildings and falling meteorites in the Hit Stages that follow each of the first four street-fighting areas. Three difficulty modes allow you to set the game to your own level of challenge, and you can select up to five lives. Even on the Hard mode, however, most enemies can be defeated using simple strategies.
Streetwise Attacks
Two attacks are all you really need. The powerful Wind-up Punch sends enemies reeling. While punching, push the Control Pad in the direction of your foe. Use the Grab and Toss technique against armed opponents. Move toward the enemy from above or below. When you're close, Sonic Blast Man automatically grabs the fiend. Now shake him and throw him at another enemy.

Hit Stage Hints
To get the most out of the bonus areas you need to deliver three massive punches to the target. Strike when the fist is dead center on the target, but also try to get the Power Punch Meter to reach its maximum. The longer you wait, the more power you can use to earn a higher score.

Stage: Mean Streets

Take No Prisoners
With his scarf flying defiantly in the wind and his super hero suit fresh from the cleaner, Sonic Blast Man looks like he's cruisin', for a bruisin'! If he hopes to reach the Construction Boss, he'll have to mop up the pavement with thugs.

Three's a Party
Only three enemies will ever appear on the screen at one time, leaving Sonic Blast Man plenty of room to maneuver. Try not to get sandwiched by attackers. Although the Jump Kick is a dangerous move, you can leap out of the way of danger if you have to.

Construction Boss
High on a building, Sonic Blast Man faces his first real test. It seems a bit strange that the garder he is fighting on remains rock solid while the background sways, but the fight is tough enough. Use the Grab and Toss technique, or smash the Boss with your 100 Megaton Punch.
STAGE: FACTORY FOLLIES

Sonic Blast Man's crusade takes him into a factory where a new set of enemies tries to work him over. Use the Grab and Toss to close in on the quick Karate Kids and Gunmen. The other enemies are just a bunch of sonic punching bags.

INVINCIBILITY

While Sonic Blast Man is using one of his Super Punches he becomes invincible, at least for a short time. If an enemy is closing in from behind, turn and fight immediately after delivering the Super Punch.

THE CLAW CLAN

The Claw Bros. leap on Sonic Blast Man and rake him with their steel fingers before you can say "eat my rust." Use the 100 Megaton Punch to defeat one Bro, then attack the other with the Grab and Toss.

STAGE: ALIENS IN THE SEWERS

Eerie, alien shape-shifters haunt Sonic Blast Man as he takes to the sewers. When an alien transforms into a bubbling pool of ooze, it becomes invincible and toxic. Attack only when it regains its true shape.

HEROES DON'T REST

One alien enemy attacks by smashing down on top of you from above. Keep moving at all times and the alien will usually miss, then you can destroy it. Also watch out for aliens that wrap you in a tentacle. Push Left and Right on the Control Pad to free yourself.

THE MOTHER ALIEN

At first, the Mother Alien releases pods that become the Tentacle aliens. When they leap, they'll try to wrap up Sonic Blast Man. Keep moving and punching to destroy them. You'll be home free once the Mother Alien releases all her pods.

Move back and forth to free yourself from the alien's grip.

This alien stretches down from the ceiling to land on Sonic Blast Man. Keep moving to avoid it. When it is standing on the floor, go after it with your Wind up Punch or other special moves.
STAGE: THE LABORATORY

Sonic Blast Man has reached the laboratory of a mad scientist who stocks his halls with fiendish robots. Fortunately, metal is no match for sonic power. Although the graphics look good, expect some character flicker and slow down.

ROBOBOSS

This mechanical monster is too heavy to throw, but straight punches will crunch its circuits. The sure way to destroy its diodes is to use your 100 Megaton Punches. Keep away from the Danger signs to avoid its missiles.

THE LASER SHOW

Laser cannons mounted on mobile tracks in the ceiling fire down while you are being attacked by robots. It's easy to keep in front of them or behind them during a fight.

Grab and Toss the Red Robot to defeat it.

STAGE: SPACE RACE

The ultimate test for Sonic Blast Man is aboard the spaceship of the villain who has brought so much destruction to Earth. Appearances can be deceptive here, especially at the end when you come face to face with your mirror image.

ASTRONAUTS OR ALIENS?

The spaceship is filled with a crew that looks like men wearing space suits until you hit them and the suits come off, revealing aliens! The aliens are tough, but the Grab and Toss technique is effective against them.

SONIC BLAST MAN 2

Could the final enemy be Sonic Blast Man's evil twin from outer space? If you defeat him, you'll learn the hidden truth, but it will mean fighting an enemy who can match your every move. It's a cool duel with a great comic book finish.

Once you hit a crew member, it will be revealed as an alien. The ship is filled with them and you must destroy them all.

This crewman will put up the fight of his life and yours.
THE SOLSTICE LEGEND CONTINUES

This new title from Sony/Imageworks is part two of Solstice, the NES adventure that introduced Shadax, the wizard. Now for the Super NES, battery-backed Equinox takes players deeper into adventure, with hundreds of rooms to clear in eight levels.

The Son of Shadax Searches for Sonia

As the curtain rises on Equinox, Shadax is held prisoner by the evil Sonia. Glendaal, the wizard's only son and an apprentice wizard himself, sets out to find Sonia's icy fortress and free his father. On his journey he learns to use magic spells and special weapons. Like Solstice, Equinox has many hidden areas and secret doors, and although the perspective takes some getting used to, it has impressive sound and graphics.
Glendaal's quest begins in Galadonia, which was ravaged by storms after the departure of Shadax. There, the young wizard learns his first spell, Heal, and finds his first weapon, the Knife. He must use them to crush Bonehead, the Galadonian guardian, before moving on to more challenging regions across the bridges and beyond.

1. Galadonia
2. Tori
3. Deeso
4. Atlena
5. Quagmire
6. Afralona
7. The Ship
8. Death Island

**THE ENEMIES OF THE OVERWORLD**

When your energy or magic powers wane, a single Troll refills your Life Meter completely; beating a Werebat yields either one Magic Potion or a delicious, life-giving Apple.

**TROLLS**

Go toe-to-toe with the Trolls that appear near passing clouds. When they pause, jump and fire directly at their chests, then move out of their paths before they leap forward or sideways.

**WEREBATS**

At first, a single, straight-on shot will ground a bat. Later, as you get closer to Sonia's fortress, they're more difficult to beat. Stay clear of their wings and fire from the side.
GALADONIA

With only 16 rooms, the dungeon of Galadonia is relatively small. Go to Room 7, pick up the Knife, then return to the first entrance and learn the Heal Spell in Room 4.

A DIFFERENT PERSPECTIVE

Use this area to learn the angles. In Room 3, you can jump over the spike to the first log. Now change your direction such as far off the edge as possible and jump over to the other two logs.

TORI

Tori's dungeon has 34 rooms and several locked doors. Try moving blocks and pedestals to reach ledges, and if something looks like it's out of reach, try jumping anyway. From your angle, sometimes you can't see the stepping-stone blocks there.

PUT SOME POWER IN THE PUSH

Push from the right. After a few seconds of shoving, the blocks will finally budge. When the block slides out on the left side, walk around and use it as a step up to the White Key.
The 45-room Deeso Dungeon has four entrances. You'll learn to carry some blocks overhead and contend with others that push you around. The guardian, Quetzalcoatl, is a real blockhead.

**THE FAST TRACK**
In Room 13, push the circling pedestal off the fast track, then shove it over next to the wall and use it to jump up to the Token.

**BIGGER DUNGEONS, BIGGER CHALLENGES**
When you close the door on Quetzalcoatl, you're in the thick of the game. The five dungeons make it possible to overcome the greater challenges that remain, become more and more complex as you face. Make a map, mark your progress, and exit—Death Island Dungeon has 107 difficult rooms, often to save your game.

THE CHOICE OF CHAMPIONS

In the Dark Ages, before the arrival of the Super NES, we sports fans had to content ourselves with simplistic attempts to recreate our favorite sports electronically. Stuff like side-view characters with unrealistic controls left us as frustrated as a surfer in the desert. We thirsted for a better sports game platform. Then came the dawn of the Super NES Age. No other system can plunge you into the heart of the action with superior 3-D perspective graphics, extended color palette and Mode 7 effects. In little more than one year, Super NES developers have already created 50 sports titles, many of which set new standards of excellence. The golden age is here, friends. It's time to strap on your thumb pads and get into the action.

JOHN MADDEN FOOTBALL '93

A NEW LINEUP OF OPTIONS DRAWS

By Electronic Arts

SAN MATEO, CA

—It's third and eight with two minutes left. Do you go for the big play, maybe a Deep Out pattern from the Shotgun, or do you call a conservative Off-tackle run? The huddle breaks and the team lines up. At the sound of your audible, the middle linebacker shifts into a hole. Will he blitz? You take the snap and step back into the pocket. The sound of bone crunching in the trenches fills the stadium. Quickly, you check off your three receivers, then throw down the sideline for a perfect reception. The crowd goes nuts and so will most football fans when they plug into the action of John Madden Football '93.

MADDEN RETURNS

Madden '93 is easy to play and has the feel of the real game. The biggest change is the addition of the best Super Bowl teams of all time and new play options. On the passing plays, receivers automatically run precise routes, and the computer will test your ability to read defenses. The new Pass Rush allows players to use their own schemes and employ the big plays they prefer. The best part is you can also play regular games with one or two players.

FUTURE FOOTBALL

SANTA CLARA, CA — Captain's MVP Football takes a unique approach to the game. You are put into difficult situations, say third and 20 at your own two yard line with two minutes left in the game and your team trailing by 11 points. If you succeed, you become the MVP. Vary your options on the Custums Sprints: screen include Semi-pro. Pro and Coach. Of course you can also play regular games with one or two players.

BUFFALO GROVE, IL — Krom's pigskin commander is NFL Football featuring Mode 7 reactions. During a pass, the view changes from sideline to sideline as the receiver. Other features include a playbook option and passwords. The large characters look good, but it isn't easy distinguishing your active player from other players. The scoreboard and playbook are awkward but the variety of plays is impressive.
SCORES BIG
Paked CROWDS

routes. On rushing plays, clearly defined characters make it easy to follow your blockers. The only problem is the awkward process of play selection.

DEFENSE AND MORE

The best teams use aggressive defenses. John Madden '93 also includes an Attacking option. Create an eight-man front by using the Goal Line formation. The excellent balance of offensive and defensive control makes Madden '93 ideal for two players. The historical teams add an even deeper dimension. Imagine the "what if's?" What if Miami '72 met up with Chicago '85? Now you can rewrite history.

IT'S A WRAP

If you want a true football experience, but you don't want to waste precious hours learning complex control sequences, John Madden Football '93 is just the ticket. Really the only thing missing is an option to play an entire season. Who knows, maybe next year.

Big Plays, Big Players

By Tradewest

CORSICANA, TX—Let's face it, in video football, the only position to play is quarterback. That's what Tradewest set out to focus on in Pro Quarterback. The behind-the-QB view puts you close to the action—a real plus. Passing is easy to learn and offers good control for both QB and receiver. The playbook concentrates on basic plays, which can be oriented to either side of the field. The play diagrams are easily read, but there is no way to hide your play selection from your opponent. Like Madden '93, Pro Quarterback doesn't have a season option. On the other hand, it is a fun two-player game that you can learn in a very short time. Standout features on Pro Quarterback include variable length of quarters, from two minutes to 15 minutes, six choices of playing surfaces including mud and snow, 28 teams, and excellent sound effects. Watch out for the over-the-middle pass. It seems the computer defense can read your mind and usually winds up making an interception. The great halftime stats are another plus. When you add it all up, ProQuarterback is a solid choice for two-player fun, but it probably isn't the game for technical football fanatics.

HOCKEY HEAVEN

NHLPA Hockey '93 promises the best action on the ice this side of the Arctic Circle.
NBA ALL-STAR CHALLENGE

By LJN

OYSTER BAY, NY—Here’s your shot to join the ranks of the Dream Team. Take on the best players from each NBA team in any or all of five basketball challenges: One-On-One, Free Throws, Three Point Shootout, Horse, and the One-On-One Tournament. These are all games of skill, so once you’ve mastered shooting, you’ll walk over the competition.

WHO’S THE BEST?

With a top star from each of the NBA’s 27 teams, NBA All-Star Challenge lets you pick your favorite player and challenge any other all-star. So who’s the best? That’s up to you. Each player certainly has his own skills, but once you choose him, you’re in control of those skills. As for control, shooting baskets is a matter of timing. Release the ball at the top of your jump. Defensive skills like shot-blocking come into play during the One-On-One matchups. It’s easy to jump out of position when blocking, so be careful to wait until the shooter jumps before going up to block the shot.

In Horse, the fancier the shot, the better in this classic schoolyard game. Practice long shots to prepare for your match. In the Three-Point Shoot Out, you have five shots from five locations.

In the One-On-One game, you can have the match length determined by time or points and you choose Winner Outs for an extra challenge. The action can be fast, but player control is awkward, especially on defense. The inside shot is definitely your best chance to score. Try this as a two-player contest for peak excitement.

SUPER PLAY ACTION FOOTBALL

By Nintendo

REDMOND, WA—This mega-Pak from Nintendo has been taking punishment on the field for an entire season now, and it seems to be holding up fine. What sets Super Play Action apart from the crowd is the number of features including three levels of difficulty (High School, College and NFL, plus Normal and Beginner options), Battery-backed-up memory to keep track of seasons, more than 60 offensive plays, substitution of players, real NFL teams and logos, radar screens and more. The game even comes with its own 32-page Playbook to help you make tough coaching decisions. Super Play Action Football is so deep that certain aspects of it are quite complex. For example, learning to pass can take a lot of practice. You have to know the passing routes almost as well as a real QB. This is not a game for the terminally impatient.

LEADING THE LEAGUE

In Super Play Action Football, you can play as much football as you can handle. Choose a college team, and try to climb to the top of the national rankings. Although the college teams are fictional, they do represent many of the strengths and weaknesses of real teams. In the NFL, you’ll play a full season. Each team has a playbook of 32 offensive and 16 defensive formations suited to the style of play of the real NFL team. If you have a good season, get ready for a brutal post-season campaign.
SAND MATEO, CA—It's been a long time in the making, but Bulls vs. Blazers and the NBA Play-offs is finally here. EA uses its proven formula of game options including two-player, pre-season, regular season and play-offs, plus passwords and customized length of quarters. The action takes place on a horizontal court with real players and teams, which is a definite strength of the game. The graphics also look sharp, especially the close-up animations.

**OFFENSIVE STRATEGIES**

1. Feed the ball to a player under the basket for an easy, high percentage shot. Finding the open man can be tough.

2. Fake the defense by quickly tapping the A Button. Your opponent will jump and come down out of position. That's the time to shoot.

3. The Marquee Shot is tricky because you can only shoot it when the right player has the ball, and it is hard to identify players.

4. Get the ball to your best shooters by stacking the offense. Substitute your best shooters, then go for the three-point shot.

**THE ROAD TO THE FINAL FOUR**

By Nintendo

REDMOND, WA—The art in "state-of-the-art" begins with NCAA Basketball from Nintendo and Sculptured Software. How do you match the excitement of college roundball? NCAA Basketball makes it look easy. You stay in the action using Mode 7 rotation and scaling. You put in the hottest teams in the country. You let them play the regular season, then head to the play-offs.

The behind-the-player view has revolutionized the way video sports fans will think about future games. Why? Because it feels real. Period.

This is true basketball with play calling, stats, coaching, aggressive defense and skilled offense. It may sound like a commercial, but the truth is they just don't get any better than this.
**NHLPA HOCKEY '93**

*By Electronic Arts*

SAN MATEO, CA—If anyone is dedicated to sports, it's EA with their EA sports lineup. The newest, and maybe the best, is NHLPA Hockey '93. The EA team that designed NHLPA captured the fast but flowing nature of real pro hockey in a deceptively simple looking game. Standard EA sports features include play-off mode, two-player action, instant replays and a password feature. The PA in NHLPA stands for Players' Association, not Pennsylvania or your dad. What that means is that the characters in the game are derived from the real rosters of pro hockey teams. The teams themselves are ranked in ten categories including Shooting, Skating, Passing and Checking, so you can compare team strengths and weaknesses before you face-off. You also have the option to restrict penalties, allowing players to check and fight freely without being sent to the box. If you choose to play by the official rules of hockey, be sure you know what is meant by terms such as “icing.”

**HOCKEY IS POWER**

Some players think that fighting is the essential element of hockey, but if you do away with penalties, you lose one of the most important strategic aspects of the game—that of the power play in which one team has an extra-player advantage. NHLPA gives you the chance to have it all, either with an all-out brawl or a tightly refereed match.

---

**HIT THE ICE, OR ELSE!**

*By Taito*

WHEELING, IL—From true hockey action we move to comic hockey action with Taito's Hit The Ice. This is really more of a street fighting game on ice. The Video Hockey League holds its matches in narrow rinks with teams of one goalie and two other players. Animation on the large characters is fun, especially when they tangle, but the actual play has about as much to do with hockey as Looney Tunes.

So what's the point of Hit The Ice? Hitting the other guy is the main strategy. In such a narrow rink, it's virtually impossible to skate away from your opponent, so you must duke it out. You'll have a choice of teams, each with players who specialize in some super checking moves. Scoring isn't easy. The Goalie is two-thirds the width of the goal, making it difficult to slip a shot past him. If you succeed in scoring, the animation is great. In the tournament mode it is absolutely essential that you do score, since winning is a requisite of reaching the championship. As a two-player game, Hit The Ice can be fun, but if you are interested in playing real hockey, then stay away from this Pak, because the ice is just too thin.
**A DOSE OF AMAZING TENNIS**

By Absolute

GLEN ROCK, NJ—What is most amazing about Amazing Tennis is the care that went into the programming of the animation. The moves you see on the screen are the same moves that tennis coaches around the world struggle to teach their students. Footwork, for instance, is essential in setting up a shot, and Amazing Tennis will show you how it's done. Credit the low-to-the-court, behind-the-player view for drawing you in. The control interface also adds to the true feel of the game. But this game is not a teaching program. It is a true sports game with a 15-player tournament mode or single matches against any of the players.

“*What is most amazing about Amazing Tennis is the care that went into the programming of the animation.*”

**THE DARK SIDE**

Next up is perspective, which is superior when you are on the near side of the court and awkward on the far side of the court. Not that it is impossible. It's just that you'd probably not have much fun serving from the far side of Amazing Tennis—sort of the tennis equivalent of being on the dark side of the moon.

David Crane, who designed Amazing Tennis, knows of what he speaks when it comes to tennis and video games. His goal of creating a real tennis environment, right down to the digitized sound of the umpire's voice calling the score, is largely successful and makes the game fun to play, especially for people who love the pure sport of tennis. It puts you right on center court.

**JIMMY CONNERS PRO TENNIS TOUR**

By Ubi Soft

SAUSALITO, CA—When one of the greatest tennis stars of all time puts his name on a video game, people take notice, and with Jimmy Connors Pro Tennis Tour it is well that they should. This game caters more to the casual tennis player than Amazing Tennis. The action itself ranges from a superior training mode to worldwide tournament play. Your options include playing singles or doubles, six types of court surfaces including a whimsical court in an Antarctica blizzard, and passwords for continuing the pro tour.

**TELEVISION 101**

Inexplicably, Jimbo doesn't do the teaching honors himself. Five fictional coaches demonstrate Service, Net Play and other techniques. If you're into gain without pain, try the Easy Control option that moves your player into position. All you have to do is swing the racquet. It doesn't get any easier than that.

Tennis is not just a game. It's also a spectacle, and for those players on tour, it's a way of life. Once you've mastered the basics, go on tour to exotic locations around the globe. You can compete at Amateur, Intermediate and Professional levels of play. If you win, you'll earn points and step up on the rankings ladder.
BEST OF THE BEST

By Electro Brain

SALT LAKE CITY, UT—Tournament karate made its debut recently on the Super NES with Best of the Best Championship Karate from Electro Brain and French developer, Loriciel. Don't confuse this game for the movie of the same name; there's no connection. Although karate may not be a main-stream sport, the action involved in this martial arts contest requires practice and skill just like more familiar sports. One of the great things about Best of the Best is the variety of kicks and punches available. It's up to you to choose the moves you'll take into the ring. Other options include Preview (your opponent), Training, Alter, Look and, of course, the Match. You won't begin your karate career at the top. Getting there will take victories in the ring and a meticulous regime of training. Build up strength, resistance and reflex in the three training activities of Sparring, The Bag and Kick Pads. You'll increase your skills faster the first few times you train than in later sessions.

THE MOVES

Great animation and a huge variety of kicks and punches—55 in all, of which you can take 13 into the ring—are the heart of the action. Customize your moves, then use as many of them as possible during a match. If you don't get a clean knockout, you'll be judged by how many moves you used.

BEST OF THE HITS

Look for the top moves shown below as you flip through the screens.

THE SECRET KUMATE

After the relatively safe and refereed challenge of the tournament comes a darker challenge—the Kumate. The Kumate is a no-holds-barred series of karate challenges. Win five regular tournament matches to get there, then face five more superior fighters in the Kumate. If you win at this top level of competition, the rewards will be great. But if you lose, you'll lose big. Unlike regular matches, you can't choose your opponent, nor can you examine his record. Use your full repertoire of moves during the match. Even though there is no referee, you will win on moves if neither fighter is KOed. Build up your attributes in training sessions before you reach the Kumate. Once there, you will not have the chance for further training. There is a second way to increase your attributes, and that is through winning. Tough matches that result in victories will increase your Strength, Reflexes and Resistance. This means that you can get stronger during the Kumate, but these fighters are truly the best of the best.
CAL RIPKIN'S BIG D

By Mindscape

NOVATO, CA—Some players ask “How many baseball games do we need for the Super NES?” while others suggest that until someone gets it right there will be room for new titles. Make room for Cal Ripkin Jr.’s Baseball from Mindscape. This game doesn’t take several years to reach the infield from deep center like so many other games. Double plays are very possible, and even triples. As for hitting, you can swing low, high, or flat. Just as in the real game, though, you have to have a good eye. The only real flash in the game comes when you hit a home run. An animated sequence takes over as you run the bases.

“This game does a number of things as well or better than any other baseball game...”

does a number of things as well or better than any other baseball game, but it isn’t perfect, either. Options include passwords, Zoom Windows On/Off, league play or exhibition for one or two players. All the basics. The fact is that Cal Ripkin Jr. is a no frills Pak. The emphasis is on baseball, period.

Most impressive is the speed of the throws, whether they come from the outfield or infield. The ball

SLOW PITCH

On the downside, unless you choose Baltimore, Cal himself doesn’t really enter into the game. Much worse, Mindscape didn’t include all the major league cities, which is pretty disappointing. As for the actual play, the only fault is the slow speed of the pitching, which is pretty weird considering how fast everyone else hurl the ball. Cal Ripkin Jr.’s Baseball is designed for players who like the true feel of baseball without gimmicks.

Realistic looking players take the field in Cal Ripkin Jr

SUPER BATTER UP HAS IT

By Namco

SANTA CLARA, CA—What does Super Batter Up have? How about all the major league players for starters, full league play from the creators of RBI Baseball, and a world-wide reputation as a winner.

The Japanese version of Super Batter Up, has been a multi-million dollar seller in Japan due to its level of detail. From great animation to solid play control, Namco has done the job. Take, for example, the animation of a base runner kicking up a cloud of dust when he slides into third, or the manager gesturing at the ump after a questionable call.

The views from behind the plate and the overhead view of the infield are great. You always know where the ball is and which player is under your control. Not so great is the fact that you can’t always tell from the shadow how far into the outfield a ball will fly, but in general, defense is simply a matter of playing smart and reacting quickly. The final word is that this is real baseball with the best players in the game and the right options.

ROGER CLEMENS MVP

By LJN

OYSTER BAY, NY—From the same people who developed NCAA Basketball at Sculptured Software comes Roger Clemens MVP Baseball for LJN. In addition to all the standard features including major league play with passwords, one- or two-player options, etc expect some novelty. The view switches dramatically as soon as the ball is hit, from behind the plate to behind the nearest defenseman in line with the ball. What this means is that you are switched to a view where you can really control your infielders and outfielders. The perspective is low to the field to add to the sense of reality. The switch takes a little getting used to at first, but very soon it will feel quite natural. The pitching, as you might expect from a Roger Clemens license, features excellent control.

Changing perspectives set Roger Clemens MVP apart.
It turns out that an underground race is stealing and stockpiling top secret weapons from World Superpowers. No one is exactly sure how the weapons are stolen. What they do know is that all of the thefts occur in an instant with a blinding flash of light. This sinister army was tracked down when an apparent malfunction in their base's cloaking device allowed their location to be approximated. The base has been tracked to a volcanic island in the mid-Atlantic. You have control of the only military vehicles capable of penetrating the base, and you're just the person to tackle this dangerous task!
Sunsoft's Firepower 2000 is an extremely difficult game. Be prepared for an all-out struggle if you decide to pop this one into your Super NES! However, because you can choose between two powerful vehicles and because it has a two-player simultaneous option, it's a blast to play.

**HELIICOPTER**

The main advantage of the Helicopter is its speed. It's faster than the ground-pounding Jeep. However, it has a major drawback. It can fire its weapons only forward. Enemies approaching from other directions will pose a serious threat.

**JEEP**

The advantage of the Jeep is that it can fire its weapons in eight directions. Its rugged suspension allows it to make short jumps. Because of its versatility, the Jeep is the recommended vehicle.

**STAR POWER**

Earn stars by defeating major enemies. Get them to earn Bonus Points at the end of each stage. Extra lives are awarded at 50,000 points, 100,000 points and every 100,000 points thereafter.
THE DESERT

Let the attack begin! The outer regions of the enemy base aren't very well developed. Shoddily-built storage sheds and crude trenches are some of the obstacles that the Jeep will have to contend with. Even though each stage scrolls vertically, the actual combat zone is about one and one half screens wide. Make sure that you travel to the left and right extremes as you progress to avoid missing valuable Item Pods.

THE JUNGLE

Giant tanks and an armada of enemy aircraft will be waiting for you and your vehicle in the lush jungle environs. By this time, you should have amassed a substantial number of Special Weapons. Difficult situations are bound to occur here because ships will come at you from the front and the diagonals at the same time. Fire off one of your Special Weapons to help you escape these intense situations.

THE RIVER BED

When you reach the dam in the River Bed stage, the Jeep undergoes a transformation. It changes from a land vehicle into a boat. You'll have to adjust to the control of the boat, as it differs from the Jeep's. The boat is a bit faster and, as most boats do, it drifts off in the direction it's travelling. You'll have to be a bit more active on the directional control.

SHIELDS

Blasting a Red Mine will make a Shield appear. It has two specific properties that will protect you, one offensive and one defensive. Don't pass them up.

You'll be invincible for 12 seconds with the Shield. An enemy destroying blast occurs if you shoot a Shield.
DESSERT FORTRESS

Concentrate your fire on the twin laser turrets on the front of the fortress. Don't get in front of them, though! The tanks that come out of the fortress will fire a single homing missile at you.

Destroying one of the tanks will yield a Star. A few seconds of constant fire should be enough to do them in.

LASER INSTALLATION

If you acquired the Laser weapon from a pod in the jungle, use it against the three laser turrets at the end of the stage. Fire at the opened turrets from a diagonal direction ONLY!

The Jeep is able to move into prime position and take advantage of its diagonal firing ability.

UNDERWATER STATION

You can take out the pods that surface around the station's core, but it's really the core that you're after! Use your most powerful weapon and move in close to score many direct hits.

Move quickly through the gap in the closing energy ring. It's the only way to avoid being destroyed by it. Fire repeatedly on the station's core.
MILITARY AIR BASE

Upon arriving at the underground force's military air base, you'll leave your vehicle behind on the runway and take over the controls of a supersonic Jet Fighter. The control of the Jet is the same as that of the Helicopter. You'll only be able to fire in a forward direction. A giant airship at 30,000 feet is your main target. Avoid the spinning rotors. Concentrate your fire at the drive shaft of the last rotor.

THE VOLCANOES

The fifth action-packed level in Firepower 2000 is not particularly long, but it has a lot of hazards. The underground forces appear to be tapping into the violent power of the volcano. Lava and molten rock will be flying everywhere! This stage may be more difficult for the Jeep. It will have to leap over small lava flows and cross larger flows on grate-like platforms. You'll find the powerful Ionic weapon in several Item Pods.

ENEMY COMPLEX

Here, in the sixth and final stage, you'll find the brain of the military's defense network. That is, if you're lucky enough to make it through to the end! The enemy forces will throw everything they've got at you. The narrow passages of the base's infrastructure will force the Jeep to follow certain paths. Be prepared to leap at any time. Don't be shy about using your Special Weapons, either.
**Main Rotor**

The main rotor at the end of the ship detaches and becomes a ship itself. It will fire heat-seeking missiles and fire balls. Fire constantly while avoiding the missiles. Shell it with several Special Weapon blasts.

**Volcano Blockade**

A lone flamethrower guards the blockade at the end of Stage 5. This is your target. Avoid the flames and pummel the fire gun. Use your peripheral vision to detect the flying volcanic rocks that come in from the sides.

**Central Core**

Your main objective is now targeted. Use your most powerful weapon to blow the cover off of the core. Watch out for tanks approaching from the rear.

After the core cover has been blown off, you'll need to launch an extra special Special Weapon that you can obtain only in this area.
From Agent #126
Stage Select and More!
The Force will be with you when you key in a versatile code for this hot title. It allows you to select stages, add lives in reserve and much more. When the Start Game and Option Menu entries appear on the opening screen, press the controller buttons in the following order: A, A, A, X, B, B, Y, X, X, X, A, Y, Y, Y, Y, B. Once the code is entered correctly, you'll hear the sound of a Jawa. If you haven't heard the sound, turn the power off, then on again, and enter the code once more. The first visible sign that the code has been entered correctly is a screen which allows you to choose from any of the game's three heroes.

When the action begins, you can instantly clear any stage from any point by pressing the Start Button on Controller II. The "Stage Clear" message will appear, your points will be tallied and you'll move on to the next stage.

Press Start on Controller II.

If you'd like to change the conditions even more, press the L and R Buttons on Controller II simultaneously. The Game Debug Menu will appear. Here you can select any stage of any area, build up to 99 lives in reserve, add to your character's health meter, change the current hero and select one of several powerful weapons. Once things are to your liking, press the Start Button to begin again. You'll warp immediately to the desired area.

Press L and R on Controller II simultaneously.
The Game Debug Menu will appear.
Change the conditions as you like them.
You'll be able to start again anywhere in the game.

From Agent #912
Custom Characters
By knowing a special code word, you can change the names of all of the characters in this street fighter. Once your game is over and you have a chance to enter your name, key in "CHRCONF" as it is shown in the photo below. The Character Name Configuration screen will appear, showing the names of the game's fighters. Change these names to monikers that are more familiar to you. Then start the game again and fight through the streets with newly named characters.
T&E Tricks

From Agent #423

This True Golf Classic from T&E Soft is built with a trio of tricks connected to the name of the company. By entering "T&ESOFT" in the tenth spot on the registration screen, you'll be able to perform these tricks. The first one allows you to go directly to the main menu when you reset the game. Press and hold Left on the Control Pad along with the L Button, then press Reset on the Control Deck. Other tricks let you skip to the game's credits and trophy ceremony. If you press and hold Up on the Control Pad along with the L Button, then press Reset, a picturesque scene and the credits will surface. If you press and hold Down on the Control Pad along with the L Button, then press Reset, the trophy will appear.

Enter "T&ESOFT" in the tenth place on the registration screen

Hold Left and L, then press Reset to call up the main menu

Hold Up and L, then press Reset to see the identities of the game's built-in pros

Auto Initials

From Agent #408

Instead of entering your own initials when you earn a high score in this mega-popular Super NES game, you can put "SFII" into the ranking list in one easy step. After your character has been defeated and you've given up the chance to continue, your ranking and a cursor will appear in the upper-left corner of the screen. Choose to end the entry without keying in any initials. When the ranking list appears, the game's initials will appear in place of a blank space.

Enter "T&ESOFT" in the tenth place on the registration screen

Hold Left and L, then press Reset to call up the main menu

Hold Up and L, then press Reset to see the identities of the game's built-in pros

When the game asks for your initials, select "ED" to end the entry

The ranking list will show "SFII" next to your high score
**FROM AGENT #617**

**Stage Select Plus**
You can go anywhere and do anything in this thrilling space-shooter by carrying out a series of button-pushing maneuvers. Highlight the System Configuration option on the Select Screen, then press and hold the R Button and press the B Button. When the System Configuration screen appears, press the L and R Buttons on Controller II simultaneously. A tone will sound and the Special Environments options will appear, allowing you to choose your starting mission up to Mission Five. Finally, press the Start and Select Buttons on Controller II simultaneously. When you hear the tone again, you'll be able to increase your stock of ships to as many as 30 and your credits up to 99. You'll also be able to choose to start fighting in any of the game's eight missions.

**FROM AGENT #926**

**Out-of-the-Way 1-Ups**
If you stray from the main path in this fast and fun adventure, you can often find 1-Ups and Magic Food Bags. Our agents have staked out Stages Three and Four and have discovered two hidden areas which contain special items in each of the stages.

**Stage Three**
The second section of this stage takes place in a cave with winding passages. At one point, you'll come across a path that ends with a pile of Star Boxes. When you inhale the Boxes at the bottom of the pile, you'll reveal a small doorway. Enter the doorway and drop into a secret passage. You'll find a 1-Up at the end.

**Stage Four**
You'll encounter a maze of clouds about halfway through this stage. When you arrive at a narrow passage in the clouds, on the left side a curious pond, go to the

**WANTED: SPECIAL AGENTS**
A popular activity among Nintendo game experts is developing tips and strategies. If you'd like to share your own special tips with us, send them in! Choose your own agent Number (3 digits) and be sure to include it with your tips.

Our Address is
Nintendo Power
Classified Information
P.O. Box 97033
Redmond, WA
98073-9733
end and press Up on the Control Pad. You'll enter a hidden passage and drop into a strange secret area. Use a Mint Leaf to fly through this starry stage and pick up Power-Ups along the way.

At the end of Stage Four, you'll fly up to a floating palace where your second meeting with Kracko occurs. Instead of entering the palace, you can get to Kracko by another route and earn special items along the way. A Crescent Moon floats above the palace. Touch the Moon and warp to a secret area filled with stars and clouds. You'll find a 1-Up and a Magic Food Bag as you fall. These items will help you prepare for your next fight.

**From Agent #721**

**Easy Money**

Our agents have perfected a way to earn Gold quickly at the beginning of this long adventure by selling off an endless supply of goods. After you leave the castle, walk to the Adventurer's Hall of Registration and create a list of soldiers. Then walk downstairs to the eatery and enlist three of the soldiers. Soldiers come equipped with Clubs and Leather Armor. By selling these items in the shop outside of the eatery, you can make more than 400 Gold Coins. After you've collected the money, take the soldiers back to the eatery and remove them from your party. You'll be free to enlist three more soldiers for another round of item thievery or to gather a more diverse group and begin your adventure.

---

**From Agent #747**

**Mission Select**

Page 37 of the instruction booklet for this bombing mission simulator describes how to use the access codes. The page includes an illustration of a pilot jotting down a code on a clipboard. While this is not a valid code as it is written, you can enter the code backwards to trigger a mission select and invincible fighter mode. The correct access code is 4093CB1#. After you key it in, return to the main menu, move the cursor to the Theater entry and press Select Button. You'll see a world map with a description of Mission One. By pressing Up and Down on the Control Pad, you can choose any of the other missions, including three secret missions. Once you've arrived at the desired assignment, start the game and carry out your commands. Your plane will be invincible, so the mission should be a cinch.
To find the Crystal Sword, which can be used by the Paladin only, go to Floor B6 of Lunar Subterrane where you find two ladders side by side and climb down the left ladder.

Turn to your left and walk straight over the gap. Next, go up to the left, turn right and walk through the wall. Go down, descend the ladder, continue down, then go all the way to the right and up to step into a portal. From there, go up across three ladders to the room with a save point. The lower exit leads to the Crystal Sword in the upper right, but you must battle the Wyvern for it. When you fight the beast, expect Wall, Nuke and Meganuke attacks.

It doesn't look like you can cross here, but keep walking. You'll cross the gap on an invisible bridge.

When you finally reach Floor B5 you'll see the Crystal Sword, but you won't take it without a fight.

Arm your party and prepare to fight for the sword. The Wyvern mounts a devastating Meganuke attack.

Where is the Hidden Treasure Room Below the Town of Monsters?

There are four chests that hold valuable treasures in a room below the Town of the Monsters. Take a secret transporter to reach the room. Walk directly up from the lower chest until you reach a wall, then take one step to the right. There will be a faintly outlined square on the floor above you. Step onto the square to be transported to the room below. There you'll find an Elixir, an Ether 2 and the Samurai Bow and Arrows.

You can see the four treasure chests resting below but there seems to be no possible way to reach them.

Walk up and over from the lower chest. Upon close examination, you'll see a faint square. Step on it.
SOUL BLAZER
WHERE DO I FIND THE PASS IN GRASS VALLEY?

When you talk to the boy who blocks the cave entrance, he tells you that you cannot enter until you have a Pass. To find the Pass, return to the southeast corner of Grass Valley and walk to the left, past the other boy's house. The other boy won't tell you where their treasure is, so don't bother talking to him. Instead, go to the Tulip near his house and push it to the left. The Tulip will move and you'll find the Pass. Take it to the boy guarding the cave entrance to gain admittance to the secret passage.

HOW DO I DEFEAT THE METAL MANTIS?

Metal Mantis, the guardian of Grass Valley, has a deadly grip. He stands in the upper part of the room on a platform connected to your area by three conveyor belts. Equip a Medical Herb, then walk up the center belt holding the R Button. When the sword touches Mantis, walk backwards to avoid bumping into him. You do not need to use the Zangetsu Sword, which you receive later in the game, to beat him.

HOW DO I FIND THE ICE ARMOR?

With the Ice Armor, you can keep your cool in the hottest situations. It's hidden in a Treasure Chest in Greenwood, but you can't get to it until you tap into a Stump's dream. Go to the island with the slumbering Stump and use your Dream Rod. You'll enter its dream behind the trees. Don't talk to the bird--that will make the dream end. Instead, walk to the right behind the tree and step onto the Monster Lair to make the bushes and rock below it disappear. Now, exit the dream and return to that area. The path you opened in the dream will still be there. Walk up and go left behind the tree to reach the chest and retrieve the armor.
HOW CAN I CROSS THE DAMAGED FLOOR IN ECHO BASE?

Princess Leia tells you that you can't cross the damaged area on foot, so you'll have to find another way across. Look for an ATST Walker in the area two floors above the damaged floor. Stand to the left of the three blocks there, shoot the top block away, and attack the ATST with your gun. Stop firing just before it crumbles, then jump in and pilot it across the faulty floor.

HOW DO I BEAT THE FLYING INSECT IN DAGOBAH?

The huge Flying Insect appears only in the jungle of Dagobah—luckily for you. A good way to wage your war is to attack when the big bug is barely on screen. You must jump the vine, and where you land will determine whether or not the insect will show. If you land too short near the vine—it won't appear until you jump the gap. If you land at the very edge of the branch, though, a bit of the bug should show. Stand there at the edge and attack by jumping and firing with the Laser Gun. After you score several direct hits with the laser, you'll see just a small part of the explosion taking place off screen.

HOW DO I GET BY THE LASER BEAMS IN CLOUD CITY?

Take advantage of one of your droid friends in Cloud City. When you meet up with Landow Calrissian, he tells you that R2D2 can shut off the laser beams for a short time. Follow R2 into the corridor with the beams and wait for him to walk into one. He blocks it for a very brief period, so you have to act fast to get through safely. Wait and fall in behind him again before you reach the next beam. Timing is critical—so stay on your toes. R2D2 is your only hope against these high-powered, non-stop laser beams.
The Hobgoblin throws bombs as he speeds by on his flying sled. You'll have to ground him before you can do any damage. Wait at the top edge of one of the buildings and wait for him to do a fly-by. While avoiding his bombs, jump, fire a web and hook onto him. The web will gradually ground him. As soon as he lands, he'll leap forward to attack. Move away and wait for him to jump. Pick up a Power Ball if possible to raise your strength, and when he lunges at you, attack with three flying kicks then wait for him to lunge again. When you beat him, he'll drop the key to the locked Warehouse.

Web him, Spidey! Latch onto the Hobgoblin and bring him down to earth. Stand back and await his attack. While avoiding his bombs, jump, fire a web and hook onto him. The web will gradually ground him. As soon as he lands, he'll leap forward to attack. Move away and wait for him to jump. Pick up a Power Ball if possible to raise your strength, and when he lunges at you, attack with three flying kicks then wait for him to lunge again. When you beat him, he'll drop the key to the locked Warehouse.

Fuel up the sled and climb aboard. You can now fly safely over the electrifying wall and on to Stage 2.

WHAT TROUBLE WE USED TO GET INTO DURING OUR SCHOOL DAYS!

PLAYING IN THE GARDEN

PLAYING COWBOYS

IT'S BEEN ALMOST 20 YEARS!

IT'S FROM WARIO! I HAVEN'T HEARD FROM HIM IN AGES!

OH! AND THE EXPERIMENT WITH COINS!

WHAT TROUBLE WE USED TO GET INTO DURING OUR SCHOOL DAYS!

IT'S HIGH TIME FOR A REUNION --I'M ON MY WAY!

PLAYING IN THE GARDEN

IT'S BEEN ALMOST 20 YEARS!
FINALLY! I'LL GET MY REVENGE FOR ALL OF MARIO'S DIRTY TRICKS!

IT'S BEEN 20 YEARS. AND HE STILL MAKES ME FURIOUS!

I REMEMBER THE TIME MARIO ASKED ME TO PICK VEGETABLES IN HIS GARDEN. WHEN I WENT TO HELP HIM, HE TOOK THE ROW OF TURNIPS.

...AND LEFT ME TO PICK PIRANHA FLOWERS! I SCREAMED FOR HELP, BUT HE JUST KEPT PICKING TURNIPS!

I'LL NEVER FORGET HOW HARD THOSE PIRANHA FLOWERS BIT!

ANOTHER TIME, MARIO TOLD ME HE'D SHOW ME HOW TO FLATTEN COINS

BUT I'M THE ONE WHO ALMOST GOT FLATTENED!
IT STILL GIVES ME THE WILLIES THINKING ABOUT IT!

AND WORST OF ALL WAS PLAYING COWBOYS!

WE MUST HAVE PLAYED "SHERIFF" AND "RUSTLER" 1,256 TIMES!

MARIO GOT TO BE THE SHERIFF 1,255 TIMES--I WAS SHERIFF ONCE!

THE REST OF THE TIME HE MADE ME BE THE CATTLE RUSTLER, AND HE GOT TO ARREST ME!

AND THE ONE TIME I GOT TO BE SHERIFF, HE MADE FUN OF ME!

I'LL SHOW HIM WHO MAKES A BETTER SHERIFF... AND IT'S NOT SOME NERDLY PLUMBER!

NOW I'M MAD ALL OVER AGAIN! I'M REALLY REALLY MAD! IT'S HIS TURN TO TAKE THE PUNISHMENT. I'LL PAY HIM BACK, ALL RIGHT--WITH 20 YEARS' INTEREST!
ACCORDING TO THE MAP, I MUST BE GETTING CLOSE TO WARIO'S!

MARIO? ARE YOU MARIO?

PLUMBER EXTRAORDINAIRE, AT YOUR SERVICE!

WELL, I'M IN THE MOOD TO CLEAN YOUR PIPES!

SORRY—GOTTA RUN. MAYBE NEXT TIME!

I'LL TEACH YOU TO COME POKING AROUND WHERE YOU DON'T BELONG!

WAIT A SEC!

HUH ??

OWWCHH!

HONK!

POP!
MARIO! WE ARE THE THREE LITTLE PIGHEADS. YOU WON'T HAVE SUCH AN EASY TIME WITH US!

WAAOOOW

LET'S GET ROLLING!

HEY, BOWLING! GOOD IDEA!

Ow!

RIGHT FOR THE KING PIN!

STRIKE!

DRAT! NOTHING'S WORKING!
HEH HEH HEH... YOU'RE NO MATCH FOR MY MAGIC!

FRY, LITTLE GUY!

FWHOOM

AACOJKK!

CURSES! I MISSED! I NEED TO WORK ON MY AIM!

BUT LOOK WHAT ELSE I'VE COOKED UP!

LEAPING LIDS! YIKES!!

FWHOOOM

Poosh... Poosh!

WAAAHH!

CLANNKKK!
THAT WOULD EXPLAIN WHY I'VE BEEN FEELING SICKLY...

I KNEW IT!

LET'S SEE, HERE.

THIS WILL DO THE TRICK--I'LL ADD A LITTLE SALT.

THAT'S VERY KIND OF YOU.

OOPS! THIS IS SUGAR!

WELL, IT'S TIME TO HIT THE ROAD!
FINALLY! THIS MUST BE WARIO’S PLACE

WARIO! WARIO!

BOINGGG!

HELLO?!
WARIO! ARE YOU HOME?

MARIO! I DIDN'T THINK YOU'D MAKE IT THIS FAR! IT'S ME, WARIO!

BWAHAHAHA!
I have a score to settle with you!

Whoa! You've gained a little weight there, Wario!

What are you doing?!

Now that's the Wario I remember!
WAAHHH!

WARIO! WHAT'S THE MATTER? TALK TO ME!

MARIO, YOU BIG BULLY! YOU HAVEN'T CHANGED!

YOU'RE STILL THE INSENSITIVE LOUT YOU ALWAYS WERE ALWAYS PICKING ON ME!

ME? A BULLY??

WHAT DO YOU MEAN? IT'S BEEN 20 YEARS! LET BYGONES BE BYGONES!

C'MON! CHEER UP!

SNIFFLE!

DON'T BE SUCH A WIMP!

O.K. SNIFF.

LET'S HAVE SOME FUN, JUST LIKE THE OLD DAYS!

I BROUGHT SOMETHING WITH ME... NOW WHERE IS IT?

REMEMBER HOW WE USED TO PLAY COWBOYS? REACH FOR THE SKY, YOU DIRTY LOW-DOWN RUSTLER!

YOU'RE RUTHLESS, MARIO! I'LL GET EVEN... SOMEHOW!

WILL WARIO EVER GET OVER THE INEQUITIES OF HIS CHILDHOOD? WILL HE EVER GET EVEN WITH MARIO? AND WILL HE EVER GET TO BE SHERIFF AGAIN???
Let the Challenges begin! The Power Player's page has now become the Power Player's Challenge. What's more, we've decided to increase coverage of your high scores by expanding the column to two full pages! Each month, we'll set Challenges for Game Boy, NES and Super NES games. On the opposite page, we listed some of the high scores of Nintendo's top Game Play Counselors. See if you can match their scores. Better yet, see if you can beat their scores! To record your gaming accomplishments, take a photo of the screen that shows your achievement. Send them to us. In future issues, we'll be printing the best results of the Challenges.

---

**THE LEGEND OF ZELDA: A LINK TO THE PAST**

**CHALLENGE**: Can you complete the game in under 10 lives? Try to follow the game, without stopping doing it! Could this?

**SUPER MARIO KART**

**CHALLENGE**: How fast can you finish Mario Circuit 1 in the Time Trial Mode? You can use any of the cars that you prefer.

**PHALANX**

**CHALLENGE**: How high of a score can you get on the Easy Mode? Don't forget your score resets if you continue!

**METROID II: RETURN OF SAMUS**

**CHALLENGE**: Can you finish the game in 25 hours or less? Try to get the highest ranking.

**TRACK AND FIELD**

**CHALLENGE**: How high of a score can you get in the Competition Mode? If you fail, try to get 10,000 points or more. This is good enough.

**PRINCE OF PERSIA**

**CHALLENGE**: How much time do you have left when you complete the game? Find the fastest route to the end. It's running out now!

**DR. MARIO**

**CHALLENGE**: Can you beat Level 24? Getting to Level 24 is tough enough, but you have to be really good to beat it!

**NES OPEN TOURNAMENT GOLF**

**CHALLENGE**: What is the lowest score you can get on the Japan course? It can be time-consuming. You know it!

**KID ICARUS**

**CHALLENGE**: How high of a score can you get when you finish the game? Be sure to explore all the rooms to get a higher score.

OK, I've got a high score. How do I take the picture?

If you beat one of our Challenges, send us your name and address with a photo of your accomplishment! To take a photo of a NES or Super NES game, use a 35mm camera without a flash. Turn out the lights in the room and shoot your best shot! To take a Game Boy photo, place your Game Boy onto a flat surface, then take your photo using natural light. Include your system in the photo.
Spin and Slick are a pair of hard-working crash-test dummies who really need a vacation. The problem is money. Their regular job doesn't pay very well, so they're moonlighting to pick up some extra dough for their vacation fund. In LJN's new Game Boy game, they hire on as movie stunt doubles, they test air bumpers, they make test runs on a ski slope, they work extra hours in a bomb factory and even hire on to guide guided missiles to earn money for a vacation. If you're a big fan of the Crash Dummies, you'll like the characters but you might be disappointed by the lack of depth in the game. You can play through all five stages quickly, then start back at the first stage again. The stages become a little bit more complex each round, but the scenery doesn't change.
TAKE A DIVE

Lights! Camera! Action! This is Slick's big chance to be a star. Move the dummy to your right, press the A or B button to jump from the ledge, and start collecting bonus money right away by crashing through the awning on the 28th floor.

SNAG THE FLAG

The more spectacular the fall, the more money you'll make. Crash through balconies and bounce off awnings on your way down. There's a flagpole on the left about halfway down. While avoiding the flames, grab it and press right on the Control Pad to swing around and land on the awning on the right, below. It's a flashy move.

DON'T GET SCORCHED

Crash Dummies are made of wood. If you free-fall into fire too many times, you'll fry. You can touch fire three times without incurring much damage, but if you burn a fourth time, your dummy will become a lump of charcoal. Before you take the plunge, study the map at the right and identify hot spots to avoid.

HIT THE TARGET

The director wants your dummy to hit the target painted on the sidewalk. It's going to hurt no matter where you land, but your effort will be wasted if you miss the bull's-eye. Stay in the center.
D ay Two: Get Some Air

Spin has lined up another job for Slick. This time he's going to be testing the effectiveness of air bumpers on cars by driving through an obstacle course and crashing into a brick wall. Slick has to be fast, too—he's racing against the clock, and the boss has an eye on him.

Pump it Up

Slick has to pick up Air Cans along the way to inflate the air bumper before he crashes into the wall. Without the air, he'll fail the crash test.

Hit the Wall

Buckle up, Slick. A Magnet in the brick wall pulls your car in at breakneck speed. Aim for the center and hope the bumper works.

Roadblocks

Don't crash into the Roadblocks. If you hit them, they damage your car and slow it down. If you collide with lots of barriers and your car sustains extensive damage, you can't complete the course.

Pick up Litter

Pick up Wrenches to repair damage to your car and watch for bundles of money lying in the track. In later stages, you'll also come across a 1-Up on the course.
**TRIPPING TREES**

You're supposed to test flags, not trees. They don't give like the gates do. If you collide with one, unbble your boots—you're done for the day.

**EARN COLD CASH**

It's snow joke. Nobody knows who built the Snowmen in the middle of the course, but the boss wants them out of there. He'll pay you extra for each one that you knock over on your way down the mountain.

On Day Three, Spin has arranged for Slick to pick up some cash by trying out a new ski course. To make sure that all of the course markers are solidly placed, he's supposed to hit as many of them as possible—without losing control and crashing into the rocks that poke through the snow.

**DAY FOUR: IT'S A BLAST**

On Day Four, the dummies go to a Bomb Factory, where they'll be responsible for Quality Control. Some bombs come down the conveyor belt already lit; Slick and Spin have to blow out the fuses before the bombs blow them to bits.

**DAY FIVE: GUIDE THE MISSILES**

Spin and Slick have their work cut out for them on Day Five. They'll be guiding guided missiles to their target while avoiding incoming missiles and contending with the gravitational pull of several space vortices. No problem.

Don't tangle with the trees. Go around. Some prankster made Snowmen all over the course. Bowl them over for more bucks.
The classic board game that has entertained generations of battle strategists comes to Game Boy in a basic translation that is true to the original, right down to the ocean grid. Although a simple game by today's video standards, it retains the basic fun feel and remains an entertaining strategy challenge, especially in the two-player mode. Stages become progressively difficult, and more complex weapons and attack vehicles are added as the player advances. All in all, the game could keep Battleship fans entertained for a very long car trip.

As with the board game, players view their own ocean grids and can only guess where their opponents have placed their ships. But with the Game Boy version, there's less opportunity for sneaking a peak over the dividing wall. Players can use Radar a limited number of times to try to pinpoint enemy ships. Without Radar, they have to systematically sweep the grid with whatever weapons they have to find and destroy the enemy fleet.
A MATTER OF STRATEGY AND LUCK

While you can strategically place your ships to try to deceive your enemy, a certain amount of luck is involved, as well. If your enemy gets lucky on an early shot and finds your ships, you'd better hope that you're lucky, too, or that you have some Radar sweeps remaining.

Battleship

The formidable Battleship is your fleet's anchor. It covers five squares of the ocean grid and carries heavy weaponry.

Destroyer

The powerful and maneuverable Destroyer fills three spaces on the grid and can take three enemy hits before going down.

Submarine

The strength of the tiny Submarine is that it can easily hide from enemy fire. Its weakness: One hit takes it out.

Frigate

The Frigate completes your fleet for now. It's a quick ship that covers only two spaces on the grid, making it tough to find.

THE WAGES OF WAR

As you win battles and develop your battle strategies, you'll earn additional ships and learn to use new, more powerful weapons. Your weapons can be used only by the ships capable of carrying them, and the two fighter planes you get must be launched from the Aircraft Carrier.

THE CRUISER

At Level 16, you'll earn the Cruiser, a bruiser that can take four hits and launch the Sea Sparrow and Tartar missiles.

THE CARRIER

You get the massive Carrier at Level 32. It takes eight hits and serves as base for the F-4 Phantom and the F-14 Tomcat.

SPS-39 RADAR

Pick up this enhanced Radar at Level 4. It covers five squares of ocean grid and spreads out farther than your other Radar did.

SEA SPARROW

The Sea Sparrow missile which you get at the end of Level 20 fires from your Cruiser and destroys a solid four grid block.

F-4 PHANTOM

Earn this high flyer at Level 36. It takes off from the Carrier and can lay down four shots at once anywhere you want them.

HARPOON

Pick up extra Harpoon missiles when Level 8 ends.

TOMAHAWK

The Tomahawk from Level 24 wipes out eight squares.

F-14 TOMCAT

The fighter fires five times at anything you want.

MK-45II

Add extra MK-45IIs to your arsenal at Level 12.

TARTAR

This missile from Level 28 spreads out four shots.

TRIDENT

Use the Trident from Level 44 to fire nine shots.
Imagine a down-scaled version of Lemmings with a Stone Age twist. In its newest release, the stony individuals at GameTek are offering a pretty cool Game Boy puzzle game. The object is to guide one of your available Humans to the goal in each level. The goal may be to pick up a certain item or to rescue a member of the Human tribe. Using items such as Spears, Torches, Ropes and Wheels, you can help the Humans survive the hazards of the prehistoric world. A password feature is definitely a bonus. You can always start over at the last level you completed with a full complement of Humans in reserve. Make sure to check out the manual, too. It's great reading!
SCREEN SCAN
At the beginning of each level you can press Select and then press the directional key to scroll around the screen and view the terrain. You'll be able to see where you ultimately need to go and what you'll need to do to get your Humans there.

CAREFUL WITH THAT SPEAR!
Your Human will need a Spear to help him vault across gaps in the rocky terrain. Make sure the Human is standing on the very edge of the gap. He can then chuck the Spear back across the gap for other Humans to use. Be careful not to throw the Spear too hard and strike one of your fellow Humans! Also, don't underthrow the Spear or Torch or Rope, etc. They may fall down into a gap where you'll never be able to reach them again.

HUMAN SACRIFICE?
If your Human is running severely short on time or caught in a strange predicament and is in dire need of a special item, press Down and the Select Button to visit the tribe's Witch Doctor. The lives of your remaining Humans may be sacrificed for valuable items such as Spears and Torches.
THE SAGA CONTINUES...

1993 looks like it's going to be a big year for Mega Man! The pathological and perennial arch-villain, Dr. Wily, appears to have a corner on the robot-reprogramming market, offering up an endless supply of radically altered mechanoids. Mega Man III for Game Boy, along with Mega Man V for the NES, should be hitting the store shelves early in the year. One has to wonder when a Super NES version of the blue bomber's adventures will materialize out of Capcom's top secret programming laboratories. We're still waiting—albeit a bit impatiently. However, for the time being, we're extremely pleased with what we've got. So here we go!
HERE WE GO AGAIN?
In previous Mega Man games, the task of getting through the stages was relatively easy when compared with defeating each of the stage bosses. With Capcom's third Game Boy release in the Mega Man series, it's turned around a bit. Now, the stages are more of a test. The enemies are more fierce and attack with deadly precision. Oddly, the boss characters seem a bit easier to defeat.

THE GAME AT A GLANCE
There are no major differences in the way this newest Mega Man game is constructed. You'll battle through a stage and then square off against a stage boss. You'll receive a password after each stage is completed.

FIRST ROUND
Spark Man, Gemini Man, Snake Man and Shadow Man are the first of Dr. Wily's evil creations that Mega Man will face off against. If you're a true fan, you'll remember these mechanical beings from the NES version of Mega Man III.

SECOND ROUND
Ready, willing and able to take a shot at the Mega one, Dave Man, Skull Man, Drill Man and Dust Man patiently wait their turn. The action gets very intense in the later stages of the game thanks to these clowns.

WILY'S GUARDIAN
If Mega Man has Energy Tanks in reserve, Punk shouldn't be too much of a problem. Although Punk can't be damaged when he transforms into a saw blade, a Mega Buster blast to his normal form should send him reeling.

THE DOCTOR IS IN?
Mega Man's sleaze-ball arch rival, Dr. Wily, just happens (surprise!) to be at the root of the current problem. Mega Man is sure that he has concocted some sort of evil plans that involve the reprogramming of robots.

WHERE'D HE GO?
Dr. Wily teases Mega Man with his presence when the blue bomber makes it into his castle. However, Wily beats a hasty retreat to let Mega Man have at it with his newest creation: a powerful transformer called Punk.

ANY DAY NOW!
After many, many battles, Mega Man will finally arrive at the area where Wily resides. It took a long time and the road was long, but a variety of weapons and health-restoring Energy Tanks helped make the trip more manageable.
MEGA HIGHLIGHTS

For those familiar with Mega Man games (which seems to be just about every game player around), you'll find the same kind of terrain that you have come to know and love. Mega Man will traverse everything from the rockiest rocks to the scales of a mechanical snake. We won't be mapping the stages out for you, but we'll hit the highlights!

**SNAKE MAN**

This slithering stage is a good place for Mega Man to begin his mission. As you move through this stage, and any other stage, hold down the B Button to keep the Mega Buster ready.

**SNAKEY ATTACK**

Whoa! There aren't many enemies in the video game realm who can match the impressive proportions of Snakey. Use the undulating motion of Snakey's body to help Mega Man leap up and shoot the gigantic beast in the head.

**WELCOME TO THE SNAKE PIT**

Before entering the Snake Pit, hold down the B Button to charge up the Mega Buster. When the battle begins, you'll have a Mega Buster shot ready to go! Let him have it and keep pelting him with regular shots and an occasional Mega Buster blast. You can jump over the small snakes, but contact with Snake Man is almost inevitable.

**SHADOW MAN**

Time-bombs and industrial-sized mosquitoes are just some of the hazards Mega Man will encounter in the confines of Shadow Man's shady territory. Jump up when the ticker on the time-bombs hits zero.

**POLES**

The Pole Eggs will hatch into full-fledged Poles if they are shot. Mega Man can take out a whole row of Poles with one single Mega Buster blast. However, a larger supply of valuable Power-Up items are bound to appear if they are destroyed one at a time.

**SPARK MAN**

All things electric are what turn Spark Man on. Mega Man will find many electrifying and dangerous obstacles as he makes his way through Spark Man's Stage.

**POLES**

The Pole Eggs will hatch into full-fledged Poles if they are shot. Mega Man can take out a whole row of Poles with one single Mega Buster blast. However, a larger supply of valuable Power-Up items are bound to appear if they are destroyed one at a time.

---

"Hey! I'll just jump up and out of harm's way!"

"WHOOSH! The Mega Buster can take out a whole row of Poles in one shot."
CLOSER TO WILY

When the first four robot bosses are taken care of and put in their proper places, Mega Man gets a sneak preview of Dr. Wily's newest digs, his castle fortress. The lightning will flash and the thunder will roar, but Mega Man's brief glimpse of his destiny doesn't count for too much. He's got many more battles to fight first, including a fierce confrontation with an enraged new enemy, Giant Suzy, in an enclosed corridor.

THE FINAL FOUR?

Fresh from their appearance in the NES powerhouse game, Mega Man IV, Dive Man, Skull Man, Drill Man and Dust Man are in the house! They're fully Powered-Up and ready for action. Their respective stages are packed full of Dr. Wily's diabolical mechanical creations. Mega Man will have to put forth his best effort to make it past these four robotic kingpins. As a whole, they are much more difficult to defeat than the first four stage bosses.

CORNERED!?!?

At last, Wily is within reach! Can it be true? Uh oh! Not yet. Punk, Wily's latest mutant creation, and one seriously bad dude, will try to slice Mega Man to pieces.

AFTER THAT SHIP!

After defeating Punk, Mega Man gets the Screw Crusher. Wily, with eyebrows raised in disbelief, must be feeling threatened by Mega Man's presence because he takes off for his castle in his spaceship. Mega Man will mount up on Rush Jet and will be hot on his heels, though! Various weapons can be used in Wily's Castle, but the Screw Crusher is a weapon that will be important to have for the final confrontation with Wily.

IS HE IN THERE?

Finding Dr. Wily in his castle is easier said than done! When his ship is found, blast the lower part of the eyes to get Wily to show his face. Don't let the ship land on you and watch out for those missiles!
YOU'D BE WISE TO SURRENDER TO OUR ROBOTS OF THE FUTURE

With each new Mega Man game Capcom releases, we're all on the edge of our seats waiting to find out what new bosses will be on hand to confront and test the powers of the mega-est hero of all, Mega Man! Judging from the responses we got from you, there won't be a shortage of new boss robot ideas for Capcom to choose from. The people at Nintendo Power and Capcom would like to thank everyone who took the time to design, draw and send in their ideas. There aren't any guarantees that the robot designs featured on these pages will actually appear in a future Mega Man game, but it certainly wouldn't surprise us if they did!

BEE MAN
Yusef Cardiel
San Francisco, CA

"You can bet your last stringer that I ain't makin' no honey! Watch out for my Yellow and Black Attack, Mega Man!"

DART MAN
David Nielsen
Dresden, NY

BLADE MAN
Jason Hondley
Collinsville, VA

FREEZE MAN
Greg Hill
Cherry Hill, NJ

"I know Greg was only trying to create a robot that could freeze Mega Man in his tracks, but... hey! Greg! I froze myself! Help me out, huh?"

OPTIC MAN
Tom Melgaard
Phoenix, AZ

NINTENDO POWER EDITOR LAST SEEN READING MEGA MAN CONTEST ENTRIES

We surrender! When we finally manage to burrow our way out of the pile of robot designs you sent to us, we'll pass along each and every one of them to Capcom. Many thanks!

BALLOON MAN
Sara Wischnewski
Wilkes Barre, PA

SCORPION MAN
Paul Benedict Jr. & Tom McNamara III
Bonnell, PA
I have a way of quickly exhausting my opponents. Mega Man will no doubt succumb to my Smoke Bomb Attacks.

SMOKE MAN
Ulysses Johnson II
Pensacola, FL

I have the ability to attack from almost any angle. Watch out, Mega Man. Ye’ll never know what hit you after I attack.

PLASMA MAN
Gerson Sanchez
Brooklyn, NY

I’ll be able to finish off Mega Man! Thanks a lot! Ha, Ha, Ha!!!

A DIFFERENT BREED OF DOG
Mega Man’s mechanical canine pal, Rush, has apparently learned some new tricks. Mega Man can certainly use Rush’s improved mobility and firepower boost.

RUSH CANNON
Gregg Wilson
Corpus Christi, TX

RUSH CYCLE
Nik Fourman Manchester, NH

RUSH PELLET GUN
Scott Kowhler
Oceanside, NY

COPTER MAN
Phil Rivera
Haledon, NJ

“T am gonna bounce all over my room until I land on your puny little head, Mega Man! My super long jumps will propel me to an easy victory!”

SPRING MAN
Michael Rocco Kenmore, NY

“Dr. Wily made me just like that fool, Mega Man. However my Mega Buster is twice as powerful! Hay, wait a minute! I just called myself a fool. Hmmm. This might be more difficult than I expected.”

CLONE MAN
Ty Stalnaker
Longwood, FL

Many powers, Mega Man, before it’s too late!
"Is it a little hot in here, or is it just me? Well, it must be me! That's too bad for you, Mega Fool! My scorching hot Steam Bombs will scald your blue hide when you try to jump over me."

**STEAM MAN**
Thurston Long
Kansas City, MO

**GLUE MAN**
James Yan
Carrol IN

"I may be vulnerable to your attacks, Mega Man but you'll pay the price if you get in the way of my Radioactive Cloud Attack. Your little blue suit will glow weird when I finish with you!"

**ATOM MAN**
Logan Addington
Barton, MI

"My scorching-hot Steam Bombs will scald your blue hide when you try to jump over me!"

**STEAM MAN**
Thurston Long
Kansas City, MO

**GLUE MAN**
James Yan
Carrol IN

"Glue Man presents an awfully sticky situation for Mega Man. First, I'll paste Mega Man with a blast from my Glue Cannon. Then I'll charge and bash him with my spiked head!"

**DIAL MAN**
Mike Stern & Andrew Namias
Wantagh, NY

**STORM MAN**
Herman Lau
Edmonton, AB

**FROST MAN**
Scott Machicote
West Islip, NY

**MAGIC MAN**
Jason Clayton
St. Marys, OH

"The clock struck four and I blew Mega Man back out to the door. Flash Man didn't really know how to use the Time Stopper, but I do. It's my specialty!"

**CLOCK MAN**
Evan Gesman
Melbourne, FL

**MAGO MAN**
Joe John Guerrero
Baytown, TX

"I'm not daddy's little girl. I'm daddy's MEAN little girl!"

**WEASELETTA & TERROR TEDDY**
Grayson Shuler
Madison, NC

"I'm not daddy's little girl. I'm daddy's MEAN little girl!"

**MEGA WOMAN**
Maxine Mercier
LaToque
Quebec

**MEGA GIRL**
Matt Cargile
Lewiston ME

"I'm not daddy's little girl. I'm daddy's MEAN little girl!"

**MAGO MAN**
Joe John Guerrero
Baytown, TX

"I'm not daddy's little girl. I'm daddy's MEAN little girl!"

**MEGA GIRL**
Matt Cargile
Lewiston ME

"I'm not daddy's little girl. I'm daddy's MEAN little girl!"
"I do a lot more than say "BOO!" My supernatural Spook Shield will protect me against blasts from your wimpy Arm Cannon. Mega Man. I'll strike fear in your metallic soul!"

"Mega Man has no idea of what he's got himself into now! I'll downgrade him against the far wall with one of my blustering Hurricane Shots. There's no eye of the storm with me!"

"Ha, Ha! Ha! Mega Man is no match for my comical Carrotwheel Attack and Sonic Laugh. First he'll laugh... then he'll cry!"

"With my ability to transform into a comet and blaze all around my mom. Mega Man won't have a hope in the entire Cosmos!"

"Nice try guys, but you'll have to try harder. See ya next time around."

FROM HERE... IT'S UP TO CAPCOM!

Some of the boss robots that appear in Mega Man V were the result of a design contest, similar to this one, that was held recently in Japan. Check out the Mega Man V review in this issue to see how these robots measure up. If we're lucky enough to see a Mega Man VI from Capcom, we just might see some of these designs included. Needless to say, we can't wait! Can you? We didn't think so.
Protoman's heinous spree of destruction has left the entire city in shambles and virtually powerless against further attack. In desperation, Dr. Cossack calls Mega Man back into action. Mega Man has a keen interest in stopping Protoman because the red-caped traitor has kidnapped Dr. Light. Protoman also appears to have deployed eight new ruthless robot masters at sites throughout the city and is encouraging them to destroy it. Mega Man knows that if he's going to rescue Dr. Light, he'll have to thrash the robot masters first!

Mega Man's popularity has done nothing but increase since Dr. Light created the blue bomber. His tremendous popularity continues to grow with the latest NES installment from Capcom, Mega Man V. The enemy robots just keep coming. And now, Protoman has gone crazy! He has kidnapped Dr. Light and is holding him and the entire city hostage. After some minor tweaking to the Mega Buster to make it more powerful, Mega Man is ready to leap into battle again.

World Gone Mad

The Vengeance of Protoman!??!
MEGA BUSTER POWER

By holding down the B Button for several seconds, Mega Man can charge up his Arm Cannon in preparation for unleashing a powerful Mega Buster blast. To a certain extent, the longer you hold the B Button, the more powerful the blast. Charge up the Mega Buster to prepare for approaching enemies.

COMPANY ROBOTS

Rush, Mega Man's computer canine helper, returns. So does Dr Light's cybernetic suitcase, Flip-Top. A new attack robot named Beat can also help if Mega Man collects the letters MEGAMAN V.

GRAVITY MAN STAGE

The gravity in Gravity Man's stage is constantly changing. Mega Man is drawn to the floor and then up to the ceiling many times throughout this stage. All control is inverted when upside down.

GRAVITY ROLL

When Mega Man crosses one of the highlighted arrows, depending on its direction, the gravitational pull will reverse and he will flip around. It takes a while to get the control down, but it's really not as difficult as it at first seems.

BUST AND SLIDE

This large robot is very powerful. Mega Man won't last long if he comes in contact with this behemoth. Use a few Mega Buster blasts or a weapon that has a long-range attack. Better yet, slide under him and run away.

GRAVITY MAN

The key to defeating Gravity Man is to stay on the opposite side of the room and fire your shots extremely well. Another key to survival is to avoid the shots from his deadly accurate Arm Cannon. When his gravitational orientation changes, so will Mega Man's. Constantly hold down the B Button to charge up the Mega Buster and fire a blast at the gravity master when you are undergoing a change in gravity. Don't get dizzy!
Wave Man's stage is mysteriously devoid of randomly roaming enemies. There are spikes and blasts of steam to contend with, but no enemies will give pursuit until Mega Man hops into the watercraft at the halfway point of the stage. Fire rapidly or use turbo on your controller (if you have it) when riding the watercraft.

Rocks, rocks and more rocks. Stone Man feels right at home in his stony surroundings. Defeating the Small Hardhats is difficult because they not only shoot at you, they also break into three smaller bouncing enemies when you blast them. Two hidden rooms can be found in this stage. Mega Man will have to blast some walls to find them.

Mega Man is going up the rails on a crazy train! Charge Man now rules the railways in the city. He enjoys deploying smaller locomotives and, oddly enough, fat mechanical chickens who hatch quick, limber-legged eggs. However, Mega Man doesn't give a toot. A few Mega Buster blasts to the head will easily take out the chickens.
THE MEGA SKI
A nuclear-powered watercraft is waiting for Mega Man halfway through Wave Man’s stage. A huge mechanical sea creature will appear from the depths. Mega Man must find the weak spot in the foreclosed area to defeat it. The “E” that Mega Man needs to collect can be found after defeating the sea creature.

WAVE MAN
The key to defeating Wave Man is knowing that he will fire a harpoon right after each water spout disappears. Stay relatively close to him and slide under when he jumps over you. Keep the Mega Buster hot.

THE “M” CAN
Entering this hidden room, Mega Man needs a Mega Tank. If he uses it, not only will his Energy be restored, but the Energy Level of each weapon will also be restored. There aren’t many tanks to find.

STONE MAN
If Mega Man runs too far away from the rock, checkman Stone Man will get into trouble. However, if he stays fairly close and quickly slides under the rocky boss, he should be able to avoid getting hit. Don’t jump and fire; just stay on the ground and turn to fire at Stone Man when he lands from one of his jumps.

CHARGE MAN
This checker can be rather difficult to defeat. When his color turns to dark red, don’t shoot him—he’s invincible. Just dodge the three flaming rocks that fall from above and change up the Mega Buster to nail him when he changes back to his original color. Jump over him when he charges at you.
The low-gravity environment of Star Man's stage makes it easy for Mega Man to execute aerial maneuvers. Several laser-toting robot walkers will be on hand throughout the stage to test Mega Man's timing. Remember, with the low gravity, Mega Man's jumping ability is greatly enhanced. Pay special attention to how hard you hit the A Button.

The inner city's urban jungle is home to the nefarious Napalm Man. Be prepared to toast the mechanical tigers with the Mega Buster when they appear. If you don't act quickly, you could be lunch.

Gyro Man likes to keep to the upper regions of the city skyscrapers. Mega Man will have plenty of opportunities to experience vertigo as he climbs upwards to the robot with the rotor on his back.

Don't be afraid of these platforms. The first two rise straight up. Just jump to the next one. Initially, the third platform appears too far out from the ledge to be able to make the jump, but it moves diagonally so it's not a problem.
**LASER 'BOTS**

This giant walker carries a laser that really packs a wallop! When it fires its first blast, jump up and rapidly fire the Arm Cannon as you return to the structure. You'll have to hit the robot in its "eye."

**LAUNCH IT!**

Star Man has placed several red pellet launchers on the moving platforms. Remember Mega Man has increased jumping ability here, so jump as high and as far as you can to avoid the obstacles.

**STAR MAN**

Star Man can and will protect himself with a circular shield of stars. He will jump up and move from one side of the room to the other. When Star Man pauses, he will let loose with his Star Shield Attack and cast off his protection at Mega Man. At this time, Mega Man should jump up and shoot at Star Man. Star Man's pattern of movement is fairly easy to see.

**NAPALM MAN**

When Napalm Man shoots his napalm, run under the blast and shoot him repeatedly. Slide under him when he jumps over you and wait for him to shoot again. When he does, run toward him again with the Mega Buster Maxup!

**SLIDE UNDER SPIKES**

It's not absolutely necessary to slide under the spikes but it gives Mega Man more time to prepare himself for the jump up to the next level. Don't hesitate, here.

**FALLING FLOOR**

To get the inconveniently placed A" in Mega Man's stage, stand on the platform just above the letter. When the platform falls, wait until you get the A and then jump to the right and quickly move an. If Mega Man really wants the letter he'll have to use precise timing.

**CARGO CARRIER**

Flytrap Dr Light's cyborgic suitcase will appear in this area and deliver its valuable contents to Mega Man. Collect it and move on!

**GYRO MAN**

Gyro Man has two methods of attack. He'll drop down from the clouds to land on Mega Man. This attack is avoided by sliding to the side. Be prepared to jump over Gyro Man's powerful rotors when he throws them at you. Prepare yourself for the attack by charging up the Mega Buster when he flies up into the clouds.
CRYSTAL MAN 

CRYSTAL MAN’s stage just may be the most difficult of the first eight stages. Slow and steady progress with ample and accurate use of the Mega Buster is the best way to reach Crystal Man’s Lair. Study the map to find the available Energy Tank and Mega Tank.

FALLIN’ GEMS

Wait for a crystal to drop down from the chute. Jump quickly to the next platform just after it drops.

CRYSTAL GUNNERS

Just after the blue and white robot has created and released his crystal payload, jump up and nail him with a Mega Buster blast. You can’t damage the crystal, so don’t get in a hurry—wait and go for the source.

PROTOMAN

After defeating all eight of the robot masters, Mega Man will be whisked off to Protoman’s stage. The area guardians will give Mega Man a run for his money. This is where the Energy Tanks and 1-Ups that you had collected in the previous stages will pay off. Of course, use them only if absolutely necessary. The purple boss shown below is very tough. He’ll stop you in your tracks with a freeze ray. Avoid it—there’s nothing you can do when you’re frozen.

PROTOMAN

What’s this? A tank? A ploy? A dupe? Yes! It now appears that Protoman has been framed. But by whom? The real Protoman arrives just in time to help Mega Man uncover the truth. The false Protoman now reveals his true self—a mechanical demon with a serious attitude problem! Jump over his energy shots and energy bars and blast him with the Mega Buster. Jump over the energy bars when they return to the evil one. Repeat the process.
You knew it all along. Dr. Wily had to be the source of the problems. Amazingly, time after time, he keeps coming back for more. When will he ever learn? One thing he has learned, however, is how to make his robots more powerful and more destructive. All of the boss robots in Dr. Wily’s stage are huge. And MEAN! Several of Mega Man’s weapons will work on the bosses, but you’ll find the Mega Buster to be the best choice.
FEEL THE HEAT
Grab your radio controller and get down to the track in this hot new racing sequel from Tradewest! These nicad beauties are fast and you'll never have to worry about running low on batteries, so round up some friends and get ready for some intense racing action in R.C. Pro-Am II!

HIGH SPEED RACING ACTION
It's back, it's tougher, and it's better than before! R.C. Pro-Am II has 24 grueling tracks filled with mind-boggling obstacles both in the air and on the ground. It'll take a skilled driver to avoid these obstacles and still gain enough points to win the R.C. Championships. Do you have nerves of steel and a road warrior mentality? If so, then rock and roll... take home the championship trophy.

4-PLAYER MADNESS!
Nothing could be better than a nice friendly racing game... NOT! Load up your car with weapons and get ready to blast away. It's every driver for himself. Your car may be slow, but it's loaded to the teeth with weapons. Pick the right moment, then blast your buddy to smithereens with a missile or steal his cash with some stinging buckshot.
Because only the top three finishers are allowed to continue to the next race, you'll need to have excellent pre-race preparation and some early success to have a lasting career in R C. racing. Save your cash for items that make a big difference!

**RACE RESULTS**

Each player receives championship points and cash prizes at the end of each race. However, if you don't finish in the top three places you'll either have to use a "continue" to enter the next race or end the game.

**MODEL SHOP**

With some hard earned cash from your successful racing career, you can visit the R C Model Shop to improve your car's performance and arsenal of weapons. Since some items are really expensive, it may be wise to save your cash during the early races so that you can buy the more expensive items that you're sure to need later.

<table>
<thead>
<tr>
<th>MOTOR</th>
<th>Pull away from your competition and improve your top speed with a more powerful motor</th>
</tr>
</thead>
<tbody>
<tr>
<td>TIRES</td>
<td>Buying better tires will allow you to corner tighter at higher speeds.</td>
</tr>
<tr>
<td>GUNS</td>
<td>Slow down your competitors or prevent them from finishing the race with these weapons</td>
</tr>
<tr>
<td>EXTRA</td>
<td>You'll find supplies for your weapons and a few other surprises here</td>
</tr>
<tr>
<td>RACE</td>
<td>Now that you're all geared up and ready to go, let's get out to the track!</td>
</tr>
</tbody>
</table>

**SPECIAL EVENTS**

Power up your fingers and get ready for fast and furious bonus games! After completing each round of eight tracks, you'll enter a bonus round. Earn additional prizes and championship points by getting to the finish line first. You can also earn a 10-point time bonus for every second you have left on the clock once you've crossed the finish line.

---

**TUG-O-TRUCK**

A battle of strength (or fast fingers), the Tug-O-Truck competition awards points and prizes to the first truck to cross the finish line.

A quick start will help you to finish first and fast.

---

**DRAG RACE**

This quarter-mile sprint has a special bonus for those who can reach maximum speed. One thousand dollars and 4 points await the drag race champion!

Maximum speed will help you win the race and gain an extra life.

---

**24 TRACKS-3 DIFFERENT COURSES**

You'll have to blast your way through each of these three different courses if you want to win the R.C. Championship Trophy! Each of the three courses contains eight tracks that may look the same, but different obstacles, changes in scenery, and increasingly difficult competition will try to block your championship run.

---

**R.C. RACE TRACK**

The competition in this miniature countryside landscape is not very aggressive. Maximize your wins here.

The tires will cushion a spin out.

Try to win these early races!

---

**R.C. CITYSCAPE**

As you race through the paved streets of town, the competition will become more aggressive.

Use the jump to pass your competition.

Avoid the bombs with quick maneuvers.

---

**R.C. 4 X 4 OFF ROAD**

Out in the desert, the competition is as fierce as the heat. Only skilled drivers can beat this heat!

A desperate try for dollars!

Use this jumps to bounce over the mud.
Here's your chance to scope out the tracks that lie ahead. Use this to plan car improvements that will help you to get past certain obstacles more quickly and safely.

**TRACK 5-2 LAPS**
Use nitro to pass or jump over your competitors in the turns and jumps.

**TRACK 11-2 LAPS**
Try avoiding these icy spots. It's hard to steer and easy to lose control here.

**TRACK 18-2 LAPS**
The competition is fierce here. Use nitro to get you over these troublesome spots.

**TRACK 1-2 LAPS**
Jump out to an early lead so you can pick up the bonus items on the track.

**TRACK 7-2 LAPS**
It's easy to get confused here. Follow the yellow arrows to stay on course.

**TRACK 13-1 LAPS**
This is a one-lap sprint to the finish. There are no second chances here!
Another average day at work at Spacely Sprockets becomes a spaced out adventure for George Jetson. It seems Cogswell Cogs (Spacely Sprockets' toughest competitor) is setting up shop on Planet M38 and is wreaking havoc on the environment and its alien inhabitants. Besides putting a stop to these unfair and oppressive business practices, Spacely has another motive to thwart Cogswell—he's making a lot of money on his illegal venture! George's boss, Mr. Spacely, orders George to check it out, before M38 is completely stripped of ore and aliens. Through twelve stages of action, George must find members of his family who will give him the gadgets he needs to confront Mr. Cogswell and end his greedy plans.
Taito's recent tradition of creating fun, side scrolling, character-based action games continues with The Jetsons. While the formula has been used in countless NES games, the graphics and animation of this game are very true to the Jetsons cartoons. George really looks like the Hanna-Barbera George! The play control is familiar enough to be fun and easy to get into. The progression of difficulty is fair and not too frustrating.

Although you meet the other Jetson family members in the game, you can control only George. It would have been nice to be able to control the other Jetsons, as you could in the Game Boy version. Finally, we liked the environmentally conscious message behind the game.

### M38--A WORLD IN CRISIS

The peaceful world of M38 was inhabited only by small, furry and friendly little humanoids who had no idea what Cogswell was up to. To their dismay, Cogswell's robots soon began to ruthlessly exploit the planet's resources.

### REMOTE CONTROLLED DEFENSE

As George makes his way through Cogswell's factories, he will meet Jetson family members who will give him defensive gadgets. These are charged by the Power Packs he will find in crates or earn from defeated enemies.

#### GLIDER

The Glider offers remote controlled defense with a small rocket drone which hovers over George's head. When an enemy appears George can launch it at the cost of five Power Packs.

#### SHIELD

The Shield protects George from enemies, but does not harm them. The Shield drains Power Packs at a high rate so turn it off once you get through a trouble area.

#### MAGNETIC BOOTS

George can walk on the ceiling wearing the boots. Select them then press the A button to jump and then the B button to slip. The boots drain Power Packs when in use.

#### FLASH LIGHT

The Flash Light emits a powerful beam which destroys all the enemies in view. Each burst of the Flash Light costs ten Power Packs, so use this gadget sparingly!

#### JET BOARD

George can fly over wide gaps in the floor using the Jet Board. It consumes Power Packs as fuel while you use it. Be careful that you don't run out mid-air.

#### PACKING FACTORY

1. **Packing Factory**
2. **Botanical Gardens**
3. **Sports Gym**
4. **Gear Factory**
5. **Dreamland**
6. **Space Ball Stadium**
7. **Blast Furnace**
8. **Cosmo World**
9. **Rock Concert Hall**
10. **Cogswell's Office**
11. **Home Sweet Home**
12. **Mining Factory**
STAGE ONE

PACKING FACTORY

George's first task is to make it through Cogswell's out-of-control Packing Factory. Sentro attacks by launching gears and mini-robo-dogs. You can defend yourself with crates which emerge from the conveyor belt on the left.

ELEVATOR ACTION

To reach the upper floor, George must flip the switch to activate the elevator. Use the crates to defend yourself against gears.

SENTRO

When George reaches the end of the Packing Factory, Cogswell will set Sentro the robo-dog on him. Sentro attacks by launching gears and mini-robo-dogs. You can defend yourself with crates which emerge from the conveyor belt on the left.

ANTI-GRAVITY 1-UP

Pull the switch here to reverse gravity. While walking on the ceiling, take the upper passage for a shortcut and a bonus Power Up robot.
STAGE TWO

BOTANICAL GARDEN

The former glory of M38's flora and fauna is preserved in the Botanical Garden. Rather than runaway robots, here George must face a variety of alien creatures, including man-eating plants! Again, crates will be your best weapon and, in this stage you don't have to worry about tiny robots hiding out inside. Watch out for a tricky jump near the beginning of the stage.

RUN AND JUMP

Jumping from leaf to leaf over the water at this point requires lots of practice. It seems to help if you jump as you walk towards the leaf. When you are on the leaf, take a short step towards the end before you jump again. It's tricky, but easy once you get the timing down.

GOING UP!

Jump straight up on this leaf and you will be catapulted into a shortcut where you can get extra Power Packs.

SPACE SPIDER

One of George's little alien buddies has been trussed up by a giant Space Spider! Use the apples as a weapon against the spider. Don't miss a chance to get in a hit. Avoid the webs the spider shoots, they will damage you and slow you down. Because the spider is rather slow, defeating it is just a matter of being cautious and persistent.

The small alien will give George the Glider Defense item.
STAGE THREE

SPORTS GYM

The Sports Gym is a very short stage with only three real enemies to fight and a tricky jump to master. You can’t really avoid being hit by the first strong man, so take your lumps and run past. You’ll then see a switch below two robotic baseball players. Hit the switch and jump onto the platform as soon as it comes into range. Don’t hesitate to jump to the next one because you won’t get a second chance. Astro will give you the Remote Control at the end of this stage, which will allow you to begin using your defensive items.

STAGE FOUR

GEAR FACTORY

The Gear Factory is one of the longer stages in George’s journey and, as you might guess, is full of gargantuan gears. Grab crates to use against attackers, and take the jumps carefully.

POWER PACK ATTACK

Reverse gravity here using the switch and take the upper passage. You’ll find a robot, which will give you bonus Power Packs, and be rewarded with another shortcut.

GEAR HEAD

On the upper floor of the gear factory, a mass of gears will chase George. You may want Jane to stop those crazy things, but she’s not around, so run as fast as you can! When you reach the end, you will have to fight the dreaded Gear Head Robot. This heap is plenty tough—throw every crate you can at him and keep your distance.

FAR OUT

After talking to Dr. Farout, you’ll head up an elevator swarming with janitor ‘bots. Throw crates at these mecha monsters when they are facing away from you.

The Glider Defense will also inflict damage on him if no crates are handy.
STAGE FIVE

DREAM LAND
George is harassed by sleepwalkers and UFOs in Dream Land. At the end, Dr. Farout attacks. Get the Invincible Shield by defeating Elroy at the end.

STAGE SIX

SPACE BALL STADIUM
For every basket you make in this stage, you get a 1-Up. Get the Magnetic Boots by defeating Elroy at the end.

STAGE SEVEN

BLAST FURNACE
The molten metal in this stage rises and falls like a fiery tide. Switches will stop the metal, turn on the lights and activate moving platforms. This is where George's adventure gets really tough!

STAGE EIGHT

COSMO WORLD
The Hardware Robot designed Cosmo World for fun, but it has been taken over by aliens. George will jump higher than normal in Cosmo World's low gravity.

STAGE NINE

ROCK CONCERT HALL
Riding a Jetboard, George must make his way through a wild rock concert full of fans, and avoid speakers that produce deadly decibel levels, to find daughter Judy.

STAGE TEN

COGSWELL'S OFFICE
Cogswell's crazy office staffers do not want to give George an appointment with the boss. When George finally reaches him, he must defeat Cogswell three times.

STAGE ELEVEN

HOME SWEET HOME
It's not home, sweet home yet! After getting maximum Power Packs from wife Jane, George has one final challenge ahead!

STAGE TWELVE

MINING FACTORY
Lots of reverse gravity tricks and weird enemies will face you in this stage. George must turn off the master computer to save the fuzzy aliens of M38 from Cogswell's out-of-control mining empire.
THE SUCCESS OF DESERT STRIKE DEPENDS ON YOU GUYS.

WHAT SORT OF DESSERT STRIKES YOU LIKE PIES? HUH?

THAT'S THE SECOND MILLION DOLLAR, STATE-OF-THE-ART AIRCRAFT WEEK. LOOKS LIKE BAD LUCK, BUT LOSING TWO LOOKS LIKE A MEDAL OF HONOR, A VACATION IN SPAIN AND THE COVER OF TIME MAGAZINE.

I WANT YOU TO PICK UP AT LEAST FOUR MIAS BEFORE YOU START SHOOTING. MAYBE YOU'LL BE MORE CAREFUL AND STAY IN THE AIR IF YOU'RE RESPONSIBLE FOR MORE LIVES.

Yeah, lose one million dollars, state-of-the-art aircraft this week looks like bad luck, but losing two looks like a medal of honor, a vacation in Spain and the cover of Time Magazine.

Yeah, all that extra weight should really help.

Did someone say dinner at eight?

NOW, MORE LIKE A FOOD FIGHT.

When your armor is below 100, get back to base and dump off the MIAs. Then we'll repair the chopper. That's an order.

Hors d'oeuvres? Now he wants us to pick up hors d'oeuvres?

I think so. War is hell, eh?
It's amazing what you can do with Mario Paint. In Volume 39, we showed you the basics of using the drawing tools, animation mode and music screen. In this special insert—for members only—we're going to show you how the professionals use design grids, much like the Stamps in Mario Paint, to make characters and create animation.
PICTURE THIS!

Even if you aren't an ace with pencil and art pad, you can create rich, artistic scenes using the Stamps from Mario Paint. It can be as easy as painting by numbers! And when you're finished making special Stamps, you can put them together and create more complex works of art.

PIECE WORK

You don't have to be Picasso to create a marvelous Mario Paint scene—which is a good thing, seeing how Picasso is no longer with us. The scene at the right was partly painted using the Mario Paint drawing tools and colors from the palette, but most of it was created with Stamps, some specially-made, others part of the program. The cat, fire flowers, Yoshi, boat and spouting whale are some of the pre-made Stamps used. The characters, however, are made from combinations of Custom Stamps. Using the special Stamps, you can create your own animated scenes.

1 STAMP IT

You can save up to 15 Custom Stamps at a time. Here we use three Stamps together to make the full sized characters, and we've saved faces with different expressions to use in the animation mode.

2 MAKE 'EM MOVE

Choose your favorite video game characters and make your own action scene in Mario Paint's Animation Mode. After you've saved Stamps that show a couple of facial expressions and that have arms and legs in different positions you can enter the Animation Mode and select the number of frames you want to use for your action. Put the figures together using head, torso and leg stamps in frame one then choose slightly different stamps for the frames that follow.

3 MAKE A BACKDROP

Now you'll want to set your own scene. Decide where the action is going to take place and create the setting using Stamps, your own drawings or a combination of the two. Here we've created a background and a foreground and we'll set the path of the animated sequence to run between them.

4 PUT IT TO MUSIC

What's an action scene without sound? After you create the setting and choreograph the moves, enter the Music Mode and add the final touch. Each of the icons in the row above the staff screen makes a different sound. Use them to either make sound effects to go with your characters' moves or to make exciting background music that adds to the mood. You can then save all three elements and replay them together.
MORE ABOUT SPECIAL STAMPS

The possibilities for using Stamps are limited by only your imagination. Send a friend a videotaped birthday greeting, complete with music, that's decorated with bright balloons. Surprise your friends by sending them videotaped party invitations. Don't just send run-of-the-mill holiday cards—send videotaped messages that really capture the holiday spirit using Mario Paint instead.

This is just a small sample of Stamps made with Mario Paint. Look for more ideas on the back cover of this booklet.

PUT YOUR MESSAGE TO MUSIC

Are you sending someone a birthday greeting? Compose your own version of the Happy Birthday Song that's a snappier rendition of that tired old tune. The possibilities are endless.
**MAKE YOUR OWN MARIO**

With Mario Paint, you can make your own Mario adventure. You design the background, create the enemies, even score the music, just like real game design teams do. You call the shots. If you want Mario's hair to be green, green it is.

**KICKIN' KOOPAS**

What will he do? You can make Mario jump onto blocks, hit the block or march over and kick the Koopa. Make it simple or complex—you're the director of this animated scene.

**MOVE IT, MARIO**

Does this scene look familiar? You can recreate settings from the original Super Mario Bros using Mario Paint Stamps. Change them, and rearrange them to make new and unusual backgrounds.

**MOVE TO THE MUSIC**

Everyone knows the theme to Super Mario Bros. Go ahead and score the traditional song in the Music Mode, or jazz it up and have Mario tapping his toe to a new version of the tune.
FREEZE FRAME

To create a Mario this size, we pasted together two Stamps. Create the illusion of walking by changing the bottom Stamp in every other Frame. Paste Mario together in the first frame, then use the hand to copy it to the others so it will be in the exact position in each. After copying, erase Mario's bottom half and restamp with different legs.

BACKGROUND STAMPS

MORE MARIO STAMPS

If you want to make it really look like Mario's world, add some of the other items frequently found in his games, such as Mushrooms, Fire Flowers, Coins, Hearts and Shells. Of course, if you want to introduce him to a new world, you should try inventing some items of your own.
LINK UP WITH LINK

Here we'll show you how to bring another video favorite, Link, to life in a scene from Zelda. One of Nintendo's first big heroes, Link continues to gain fans in his latest adventure, 'Zelda: A Link to the Past.'

DUNGEON DISCOVERY

The scene at the left could have come right from one of the dungeons in the original NES Zelda game. In this animated sequence, Link marches in from the left and draws his sword to slash at the bobbing Bat. Now you can make your own Link and put him in whatever setting you choose. Create new monsters for him to fight and devise your own scenario for the famous fighter. Here, the background is made up of simple Stamps, and the Hearts and Rupees are easy to recreate, too.

SLASHING BATS

It's lil' Link against the dungeon monsters. He walks in holding up his shield for protection, then he drops the shield and wields the Magic Sword to attack the Bat.

THE MISSING LINK

Of course, any scene with Link would be incomplete without his famous music. Try to recreate the tune by copying the composition below into your own Mario Paint cartridge or play around with it and compose your own version.
ANIMATION STAMPS

Use the chart below to see which Stamps we used in the nine frames of animation we made for this scene. Check the screen shots at the right to see where to place each Stamp.

BACKGROUND STAMPS

The Stamps used for the background are surprisingly simple to make, but when pieced together, they make an interesting backdrop for Link's animated scene. Recreate the scene just the way we did, or make up your own scene putting the doors and obstacles wherever you want them. If you prefer a more complex background, make up your own set of Stamps with more colors and shapes.
SAMUS ON THE RUN

We asked the development team that designed the real Metroid game to make a Samus that runs using Mario Paint. They said that it was a piece of cake—they used a similar system to create the original character. Now you can make the real thing using your own Super NES.

GO, SAMUS, GO

It takes three Stamps to create some of the positions that make Samus look like a runner. Together, the various Stamps show her hoofing it through familiar territory in a Metroid corridor. Four frames of animation are enough to create the effect. See the sequence below for placement of the Stamps.

MOVING METROID

From a standing start, Samus appears to be running away from the closed door as a monster hovers overhead. You’ll find that this sequence looks remarkably like the running Samus in your NES Metroid Game Pak.

METROID MUSIC

Adding the Metroid music makes the sequence more complete. Use the familiar music scored below or create a new theme or sound effects for your own Samus scene.
STAMPS FOR SAMUS

1. SAMUS #1
2. SAMUS #2
3. SAMUS #3
4. SAMUS #4

THE MONSTER
The slight change in the monster's size will make it look like it's pulsating when the Stamps are switched in every other frame.

FACE-OFF
Although it's not shown on the facing page, you can make Samus start from a standstill if you want to use additional animation frames.

BACKGROUND STAMPS
The dark corridors in Metroid are lined with blocks made from Stamps like those below. The stamps at the right are pieced together to create the door. Use them to make corridor configurations of your own.
**BUILD A CASTLE**

You can use Mario Paint Stamps for more than just creating characters from video games. You can also lay lots of Stamps side-by-side to build scenes that take up the entire screen. The castle below was made by using 13 different Stamps.

---

**UNDER CONSTRUCTION**

This grand castle was built with only the Stamps on the facing page. The Stamps used to make the arches and the foundation were flipped using the Rotate/Flip icon so one Stamp could print in both directions. Background Stamps, such as the doorway and the recessed courtyard, are placed first, then the foreground is Stamped over them to create a feeling of depth. For example, the windows were Stamped over bricks, then the flags were Stamped over both bricks and windows. Finally, the soldiers were added in the Animation Mode.

---

**ENEMY ATTACK!**

In the animation sequence, a troop of soldiers attacks the castle. In your own remake, you could add different animation - perhaps you would prefer to have a fine cannon put up to the front door.

---

**CREATE A CLASSIC**

What kind of music is in keeping with a castle? Use the Music Mode to duplicate the composition or, better yet, create your own classic.

```
\[ \text{Sheet Music} \]
```

---

**MARIO PAINT**

40
**SOLDIER STAMPS**

In the four-frame animated sequence, the same troop is copied to all frames. The Animation Path is used to move them towards the castle from the lower right.

Although the positions of the individual soldiers don't change, two different soldier stamps are used for diversity.

**BACKGROUND STAMPS**

Take a close look at these stamps and try to find where each was used in constructing the castle. Subtle shading on some adds dimension to the finished structure. Several of the stamps served double duty; they were flipped and used as mirror images in the opposite direction, thus eliminating the need for additional stamps. Just imagine what kinds of buildings you can construct.

A close-up shot reveals the placement of the layered window and flag stamps. It's not as complicated as it looks.
OLD MACDONALD'S
Picture the possibilities. Animate a favorite story. Paint a scene for a song and put it together with your own version of the melody. Here, we've imagined an animated scene to go with a long-loved children's song—and Old MacDonald never had cows like these!

A FUNNY FARM
When the farmer's away, the animals play. Old MacDonald had all kinds of critters on his farm, but he probably didn't have dancing cows—until now. We pictured a lovely lineup of divine bovine dancers adding a little life to the barnyard, and the animal sound icons in the Music Mode were the perfect touch for our version of the tune. First we illustrated the background, then we added the animation and set the dancers' path. What do animals do when the farmer isn't looking?

A MOO MOO HERE
This lineup of lovelies boots it up from the right and continues through the main corral while the lookout on the lower left watches out for approaching humans.

NEW MACDONALD
Take the time to try out our version of Old MacDonald Had A Farm. It's composed with a Bark, Bark here and an Oink, Oink there—just the touch for the tried and true classic tune.
A BEvy OF BOVINES

These dancers aren't quite in sync. You'll notice that their positions change in every frame, but they aren't always in step. Check the chart to see which cow quarters were used in the nine different frames.
PARASOL PILOT

Fans of Super NES Pilotwings will recognize the background below, sketched using Mario Paint. The pilot in the game may have had a jetpack, but ours is powered by a parasol instead. Take aim on the target or make him land wherever you want him to.

WATCH THE WINDSOCK

Where will the breeze carry our umbrella man? We could set the animation track to carry him through the circle of orbs towards the striped target below—or let the wind carry him off.

MUSIC IN THE AIR

Now put your aerial acrobatics to music. Try our tune on your own Mario Paint Pak.

PAINT A PILOT

The Pilotwings-like background is painted with crayons and paintbrush, and Mario is put in position with pre-made stamps. The circle of orbs is made with a custom stamp we created to look like the ones from the game. Now we can make our own pilot fly into the scene with his pop-up parasol, one mode of flight not dreamed up by the game’s developers.
ROUND & ROUND HE GOES

Our pilot spins as he drifts down, and his parasol opens and closes as he bobs up and down. Because it took many Stamps to make a character this big, we replaced Stamps with new ones after we used them. This increased the number of Stamps we could use to over 15.

STAMP MAN

To create the full-length face on view of the floating man, it takes nine of the 15 Stamps. The arm position will remain the same in all frames, but the legs, head, and umbrella change from frame to frame.

MAKING THE MAN MOVE

We used six frames to create the effect of the man spinning in a circle. In the first frame, his back is to us. In the second, he starts to turn to the right, and by the third we see the full-face view.

BLUE ORB

After looking closely at the Pilotwings game, we were able to reproduce the orbs that you must pass through to reach the target. We used the single Stamp on the right to make the circle in the background.

MORE STAMPS FOR MOVEMENT

HELMET HEAD

The two Stamps on the left are the side and back views of the man's helmet, the two on the right are two more positions for the parasol. We flipped the Stamp on the far right to make the fully opened parasol.

FOLDING FEET

To add some more movement, we used three Stamps to make the man's legs bow. To create complex images of this size, you'll have to replace some of the Stamps with new ones after you've used them. And you might have to flip some and use them several times.

Go behind the scenes to learn how Nintendo measures the quality of games.

FOR SUPER POWER CLUB MEMBERS ONLY!!

STAR FOX MODEL

Last year was quite a year for video games. The Super NES surpassed the competition as its library ballooned with such technologically superior games as Street Fighter II and The Legend of Zelda: A Link to the Past. And while the Super NES grabbed the most attention, many new releases for the NES were added to the 8-bit library, continuing to make it the largest collection of titles for any single video game system. The success story was similar for Game Boy, which crosses over to appeal to players of all ages and genders better than any other Nintendo system.

Because there was so much great software released in 1992, it was difficult to narrow our list to only ten titles per system. Deciding which games were eligible for the list compounded the challenge, as many of the games that became big hits in 1992 were actually released in late 1991. Our picks for the best games of 1992 were determined by game ratings of the pros at Nintendo, votes sent by readers to our monthly Top 20, and input from the editors at Nintendo Power. We tried to choose games that were well designed and that added diversity to the Nintendo game library. Technological advancements and gaming innovation were weighted more heavily than sales figures were.

So here it is—the definitive list for 1992. All of the titles that made our Top 10 are highly recommended.
The second year of the Super NES will be remembered as the year in which programmers and designers really tapped into the system's capabilities. Examples included titles like Super Contra III, which used 16-bit graphics and Mode 7 to create new game play experiences, and The Legend of Zelda: A Link to the Past, which provided two worlds for long play value. But the video game cartridge event of the year was Street Fighter II: The World Warrior, which crammed an arcade system into an Super NES cartridge!

1 Street Fighter II: The World Warrior

After a lot of heated discussion we finally placed Capcom's Street Fighter II, The World Warrior at the top of our Super NES game list for 1992. Street Fighter II brought its arcade mystique intact to the Super NES. The conversion was almost flawless and well-nigh identical to its coin-operated big brother. Full use was made of the Super NES's technological capabilities to create large colorful characters and animated backgrounds. Although the Super NES controller was not laid out the same as the arcade machine control panel, the play control of the home game was still excellent. The impact of this game on the Super NES was enormous, as many players who were undecided about upgrading to 16-bit were finally convinced by this title. Quite simply, Street Fighter II for the Super NES made it possible for any player to afford an arcade machine at home. Only the graphic superiority of the Super NES could allow for this kind of game exclusive. Two-player simultaneous play and secret codes added to the lasting interest in this title. This game should have a permanent place in the monthly Top 20 well into 1993. Though a relative newcomer in the Top 20, Street Fighter II recently blasted Super NES Zelda out of the number one position by scoring a record 34,824 points. Time will tell if this game has the staying power to remain number one.

Nintendo Power Coverage: Volume 38
The Legend of Zelda: A Link to the Past

The return of Link and the other characters from the Legend of Zelda in "A Link to the Past" was another banner video game event of 1992. Link's new quest takes him through two huge fantasy worlds which are woven together like a giant puzzle. The underworld labyrinths are filled with more monsters and traps than ever before and are portrayed in life-like detail courtesy of the Super NES's 16-bit graphics. This game continues to light up Nintendo's Game Play Counseling line with callers looking for clues. Another Super NES exclusive Nintendo Power Coverage: Volume 34, and The Legend of Zelda: A Link to the Past Player's Guide

Super Contra III: The Alien Wars

Contra III made such excellent use of the Super NES's 16-bit graphic capabilities that it was indeed a ground-breaking game. Each stage of this awesome shoot-em-up is completely different from the one before. The action is intense and challenging and the graphics explode off the screen. Even members of our staff who are not big "dodge and destroy" fans loved this game. Contra III set new standards for action games with its clever use of Mode 7 scaling for zooming in on enemy characters and for creating new play experiences. Nintendo Power Coverage: Volume 36

Super Star Wars

Respect for the Star Wars license is evident in the care taken by Lucas Arts and Sculptured Software in designing Super Star Wars. True to the movie, the game included digitized images from the Lucas archives as well as sampled sounds, voices and music that really makes gamers feel like they are "playing" the movie. Combine the faithfulness to the film with great game play, and you have another of 1992's Top Super NES games. Nintendo Power Coverage: Volume 42

Mario Paint

Mano Paint is a unique piece of Super NES software. Together with the Super NES Mouse, users can create their own paintings complete with animation and music. Mario Paint earned a spot on our Top 10 for giving players a chance to be creative and for including the Super NES Mouse that opened up potential for new types of software using its interface power. Check out this issue's 16-page book to see how you can create video game "sprites" with Mano Paint. Nintendo Power Coverage: Volume 39, 44
Since we first played F-Zero, we wondered how much fun a two-player simultaneous version of the game would be. We got our answer in Super Mario Kart. Not only does the game feature split-screen Mode 7 that gives both players their own views on the action, but it also has a wide variety of wacky weapons to trash your opponent with. (There's nothing we like better than leaving a banana peel for tailgaters) Nintendo Power Coverage. Volume 41

Don, Mike, Raph and Leo are back in another time spanning adventure that continues the tradition of TMNT video games. The turtle characters are well animated and large through the use of the Super NES's 16-bit processor. Despite the game's similarity to previous TMNT games, the popularity of Konami's TMNT series with players and the new theme of time travel put this one into our year end Top 10. Nintendo Power Coverage: Volume 39

Though this game may not be for everyone, it ranks in our Top 10 due to its uniqueness. Until now, games with this kind of cinematic feel and bitmap style graphics have been relegated to personal computers. The play control was challenging (as the score in Play Control indicates), but the look and feel, theme and fun, and overall concept of this title were all top notch. Recommended for expert players. Nintendo Power Coverage: Volume 41

The first game to use Mode 7's rotation capabilities to their fullest advantage in a sports title was NCAA Basketball. With the player's viewpoint following the action, this game puts you out on the court and in the middle of the action for shooting three pointers, lay-ups and super slam dunks! The inclusion of over 40 top college teams made for a unique touch not seen in previous sports titles. Nintendo Power Coverage: Volume 38

Sonic put the heat on Super NES game designers to increase the speed of their games, and Sunsoft met the challenge with Road Runner's Death Valley Rally. This game definitely shows that programmers are learning how to get the most out of the Super NES's speed potential. The feeling of the classic cartoon is captured through great character animations, sampled sounds and hilarious defeat scenes for Wile E. Coyote. Nintendo Power Coverage. Volume 43
The Game Boy story for 1992 paralleled the developments for the Super NES. As programmers became more familiar with the pocket powerhouse's operating system, more action and fun was packed into its tiny little paks. In addition, a wide variety of software was made available for Game Boy, from InfoGenius's line of useful Productivity Paks to Accolade's translations of classic arcade standbys. We were also glad to see Hi-Tech make a "real" game starring Barbie. Gaming on the go has never been better!

Super Mario Land 2: 6 Golden Coins

Super Mario Land 2 features the largest ROM configuration of any Game Boy game so far--4 megabits! The programmers and designers used this memory to create a giant land for Mario to explore, both in depth and size of character graphics. With almost twice as many levels as the previous Mario Game Boy game, Super Mario Land 2 settings vary from deep beneath the sea in the Turtle Zone to a haunted house in the Pumpkin Zone to the very moon itself in the Space Zone. The large characters are easy to see on the Game Boy screen, and combined with the great play control, they allow players to take Mario to new heights. Like every new Mario game, new transformations for our plumbing protagonist are the order of the day in Super Mario Land 2. This time, a Magic Carrot turns Mario into a high-flying hare. Mario's rival Wario adds another great bad guy to the Mario mythos. Super Mario Land 2 hasn't had much of a chance to make a showing in the monthly Top 20 yet, but based on the long run of the first Game Boy title featuring Mario, we would bet on this one taking its place at the top before long. Though there's been some talk of over-exposure for Mario, based on the player's response to this and all of his past games, it seems people can't get enough of him! Nintendo Power Feature Coverage: Volume 42
2 Mega Man 2

Capturing the NES experience on the Game Boy's small screen is a challenge, but no character has made the leap better than Mega Man. The Blue Bomber's simple but futuristic graphics stand up well to miniaturization. Game Boy Mega Man 2 combined the best elements of NES Mega Man 2 and 3, including the robotic dog Rush and the dastardly Clash Man. Metal Man, Wood Man and Air Man. Mega Man 2 has ranked in the monthly Game Boy Top 20 a couple of times and should hold a regular spot there in the future. *Nintendo Power Coverage: Volume 34*

3 Bionic Commando

Long time fans of the NES will surely remember the Capcom action classic, Bionic Commando. We're surprised he hadn't made a comeback sooner, but we weren't disappointed with his Game Boy adventure. It features a hero who is armed with a cool bionic arm that can be used to swing from tree branches and cave ledges. This super soldier also has a variety of other military gadgets to keep the enemies at bay. The game is well-rounded and follows the basic design set forth in the NES original. *Nintendo Power Coverage: Volume 41*

4 Tiny Toon Adventures:
Babs' Big Break

“Babs' Big Break” follows Tiny Toons Buster Bunny, Plucky Duck and Hamton Hop as they ensure that Babs fulfill her dreams of Broadway stardom. While the game has plenty of fun, sideview action, it also includes other activities like feeding Dizzy Devil and finding Furrball, which add variety and lasting interest. The well-rendered graphics capture the spirit of the cartoons. The game is fun and you don’t have to be a fan of the Tiny Toons to enjoy it. *Nintendo Power Coverage: Volume 34*

5 Gradius: The Interstellar Assault

Gradius: The Interstellar Assault provides a non-stop roller coaster of space age action right from the opening scene. The familiar options from the previous Gradius games are back, ready to Power-Up your ship into an awesome weapon. An amazing number of enemies are displayed on the Game Boy screen without noticeable slowdown, and the play control is super precise. This is possibly the best straight shoot-em-up to appear on Game Boy yet. *Nintendo Power Coverage: Volume 33*
6. Batman: Return of the Joker

Although Batman: Return of the Joker has only four stages, they are long, the continues are limited, the Power-Ups are few, and the "toys" are scarier than in an original Batman #1 comic! Batman is much larger and more realistic than he was in the first Game Boy Batman pak. The play control is similar to that of the first NES Batman pak, where Batman could cling to walls and attack with his Batarang. *Nintendo Power Coverage: Volume 36*

7. Track & Field

Track & Field offers 11 great track and field events. Although the hyper-fast, button-pressing play control may not be every player’s forte, we thought it was unusual and easy and that it added to the fun. The introduction of the game timed well with the Olympics and was a clear winner among games of the same theme. The two-player mode really adds to the challenge and spirit of competition. *Nintendo Power Coverage: Volume 43*

8. Kirby’s Dream Land

Like our other Top 10 Game Boy titles, Kirby’s Dream Land features large, easy-to-see characters, great play control and a variety of game play actions. The new Kirby character has a broad appeal and can be enjoyed by a wide variety of players. And don’t let the first play through the game fool you; the second time around Kirby’s Dream Land is one of the most challenging action tasks you’ll find on Game Boy. *Nintendo Power Coverage: Volume 39*

9. Looney Tunes

Classic characters like Daffy Duck and Road Runner appear in this new seven-stage action game. The game play is again standard side-scrolling stuff, but it’s much more challenging than Tiny Toon Adventures. In addition, older players who may not be followers of the new Tiny Toons liked the familiar Looney Toons better, although game play was similar in both games. *Nintendo Power Coverage: Volume 43*

10. Yoshi

When Nintendo announced a game starring Yoshi for Game Boy (and NES), some players might have expected an action game rather than a puzzler along the lines of Dr. Mario. Yoshi combined puzzle aspects of Tetris with likeable characters from the Super Mario Bros. universe to create a simple but challenging mix-and-match contest which was well received by players of all ages. *Nintendo Power Coverage: Volume 35*
Still going strong after six years, the NES remains the most popular home video game system of all time. With a library of approximately seven hundred games, it offers something for everyone. Our choices for the Top 10 NES games of 1992 show that plenty of potential for fun still exists in the 8-bit video game market, especially for games featuring popular characters from TV and movies. With such a gold mine of characters to select from, the possibilities for NES game ideas will never be exhausted. With lots of new titles being added to the 8-bit library all the time, the NES continues to have a long, bright future. Here are our picks of the games now available.

Mega Man IV

Mega Man IV adds just enough new elements while still keeping the tried and true flavor of the previous Mega Man games. In any new Mega Man game, it's a given that there will be new robot foes for Mega Man to battle. Ring Man, Dive Man, Toad Man, Bright Man, Skull Man, Dust Man, Drill Man and Pharaoh Man all live up to the challenge level of their predecessors. The surprise ending isn't really a surprise to seasoned Mega Man players, by now it should be obvious that if Mega Man is in trouble, Dr. Wily is behind it. Nevertheless, the story elements of Mega Man IV are deeper than in previous Mega Man games and they delve into the origin of the Super Robot further than ever before. These kinds of details are always appreciated by Mega Fans! In all the Mega Man games, we have been very impressed by how Capcom gets the most out of whatever system they are programming for. The totally huge boss characters in Mega Man IV really show off some programming skill! Three Mega Man games are in the NES Top 20, and the highest ranking one is Mega Man IV. Always near or in the top five, this game scored a high of over 8,000 points. Now that a 16-bit Mega Man title has been announced, can it be long before the Blue Bomber rules all three systems?
2 Darkwing Duck

Let's get dangerous! Character games have always been what the NES is best at, and Capcom produced another great one starring Disney's Darkwing Duck. The game play is slightly reminiscent of Mega Man, but with enough differences to make it a distinctive game. DW's ability to hang on to ledges and swing from hooks suspended high above the city add to the fun and challenge. The graphics and dialogue portray the cartoon and comic based characters very well and the game play is challenging. The game was rated highly by the pros at Nintendo. *Nintendo Power Coverage: Volume 36*

3 Lemmings

A popular game with many of our staff members and the pros at Nintendo, Lemmings possesses that addictive quality that all great puzzle strategy games have. While a Super NES version of this title was also released, we gave the Top 10 nod to the NES version because it plays the same on an 8-bit machine, which goes to show that you don't need spectacular graphics to create an engrossing game play experience. Give Lemmings a try. Once you've saved a few levels of the helpless, mindless little guys, we think you'll be hooked. *Nintendo Power Coverage: Volume 37*

4 TMNT III: The Manhattan Project

Konami stuck with a winning formula with TMNT III, producing a game that is very similar to the hit TMNT II: The Arcade Game. New moves like Leo's Spin Slash, Raph's Drill Attack, Mike's Handstand Kick and Don's Somersault Slash add individual character to each of the turtles and give them an edge against Shredder's minions. Reckless monster trucks and ambushing Foot Soldiers make things tough for the heroes in a half shell. *Nintendo Power Coverage: Volume 33*

5 Rampart

Cross Tetris with medieval warfare action and you get Rampart, one of our favorite player vs. player games of the year. Like Lemmings, this game is also available on the Super NES, but the NES version plays just as well. Like Lemmings, the strength of this title lies in its game play rather than its graphics. If you have a game-playing partner you like to compete with, we recommend that you challenge him or her to battle with Rampart. *Nintendo Power Coverage: Volume 33*
Ultra's Star Trek for the NES allowed gamers to boldly go where no player has gone before. The video game captured the feeling of the classic television show with role-playing-like dialogue between the characters and tricky puzzles for the crew to solve. While the game will not take five years to complete, there is a good variety of planets to beam down to and explore. *Nintendo Power Coverage*, Volume 29

Although the title and look of Little Samson may be on the cute side, the play is challenging and is made interesting by the fact that you can take control of any of four different characters. Each character has a different ability that actually makes the game play differently. The boss characters are large and impressive, and the game's eight stages are varied and interesting. *Nintendo Power Coverage*, Volume 40

Captain America & The Avengers gives you a choice of two characters to control: the super patriot, Captain America, or the avenging archer, Hawkeye. Cap uses his shield for both attack and defense, while Hawkeye's bow and arrows are best used for attacking. The one-on-one mode, which lets you battle a friend, is lots of fun. We especially like the fact that one player can take on the role of a villain. *Nintendo Power Coverage*, Volume 35

Gargoyle's Quest II combines elements of adventure and role playing games to give players an in-depth world to explore with plenty of action. The high point of Gargoyle's Quest II is the play control for the winged hero, Firebrand. It takes a while to master but really adds another dimension to the game. Set in the ghastly Ghoul Realm, the moody graphics add to the spooky theme. *Nintendo Power Coverage*, Volume 39

Hudson brings back the ever popular Felix in an NES adventure that has the famous feline trying to rescue Kitty from the clutches of the Professor. Again we have a familiar game play setup with side scrolling action and lots of Power-Ups. In spite of some minor inconsistencies between the TV show and the game, you'll find good play control and a wide variety of "vehicles" for Felix to ride, from a rocket car to a dolphin to a spaceship. *Nintendo Power Coverage*, Volume 40
Imagine that you are at the controls of a star fighter above an enemy world. The globe beneath you turns into night as a squadron of hostile alien ships appears. Before long you are screaming out of the stratosphere toward a heavily armored fortress planet where you must skillfully maneuver your ship past armored towers and through city canyons. The fireball from an exploding missile suddenly engulfs your ship, but in a flash you have sped into the open only to meet a squadron bearing down on you at super sonic speed.

Now imagine you have entered an empty mansion. Slowly you move from room to room, sensing that something terrible once happened here. Haunting music plays in the background as you explore further. You half expect the rattle of chains or eyes in a painting to follow you about the room. Suddenly, an apparition appears in the hallway and rushes toward you then vanishes! The house, it seems, is filled with tortured souls. What was their fate, you wonder, and what will be your own?

These two scenarios may seem to be fairly standard storylines for video games. In fact, they describe two remarkable games that are bound to change the way we look at all video games in the future. What makes these games special are the technologies they use and the resulting new game experiences for players—chiefly a new level of realism. The two scenarios also illustrate a split in the direction of future gaming, which is also a result of the technological format used by each game. The first scenario is taken from Star Fox, the first game ever to make use of Nintendo’s custom Super FX chip. The second scenario describes The 7th Guest, considered by many to be the most advanced CD-ROM entertainment product created to date. In this article, you’ll learn why these products are so remarkable. You’ll also see that these games, as impressive as they may be, are only the beginning of a revolution in home entertainment.

THE STAR FOX ODYSSEY

This Spring, a game unlike any other will appear in stores. Nintendo’s Star Fox will be the first game to make use of the custom Super FX chip. Since the chip itself is buried inside the Game Pak, the only evidence of this miniature marvel will be on the screen. The first thing most people will notice is the use of polygon graphics. Your spaceship is clearly constructed of many flat shapes, or polygons. Other objects in the game are also made from polygons, but they may be less obvious. One of the great advantages of using polygons is that you can rotate them to create a 3-D effect. Another advantage is that polygons don’t take up as much memory space as character-based objects like sprites. Since a polygon is a geometric object, it can be described with a fairly simple formula. Scaling a polygon, or
ES, FUTURE GAMES

making it grow or shrink, is also easy because it's just a matter of plugging a new variable into the equation. Actually, the 3-D objects like buildings and ships used in Star Fox, are made from multiple layers of polygons. Each surface is a single polygon. The collection of polygons that make up an object can be instructed to move together so that they seem to be one object.

Some arcade and PC games already make use of polygon graphics, but until now, no home game system has had the power to manipulate the number of polygons that can make up a single screen image, and do it with real-time speed. The specialized functions of the Super FX, however, change all that.

SUPER EFFECTS

The Super FX is what engineers and programmers call a RISC, which stands for Reduced Instruction Set Computer. What it does in simple terms is to make a lot of very specific types of calculations very fast. The specialized calculations are used to create special effects such as the scaling or rotation of sprites and polygons. In past video games, all calculations of this sort were carried out by the Central Processing Unit (CPU). Although the CPU is more powerful than the Super FX chip, it is not as highly specialized. You might say that the CPU is like the quarterback on a football team. The QB calls the plays, throws the ball, hands off, or runs it himself. He may also call Time Out, change the play at the line of scrimmage or decide if the team will accept a penalty.

The quarterback has many skills, but even so, you can't expect him to do everything himself. At some point, you have to bring in a specialist. In this analogy, the Super FX might be like a field goal kicker. All he does is kick field goals, but he's very good at it. You might say that if the Super FX were a field goal kicker, he could boot it through the uprights 100% of the time from as far away as 100 yards, and he could do it 60 times a second! As you might imagine, such a kicker would change the game of football.

In Star Fox, the Super FX is used to rotate and scale polygons and sprites on the screen. For instance, you are flying close to the planet's surface. Ahead you see the towers of a city. At this distance, the towers are small, but your speed is great and they are growing larger rapidly. Those buildings are created from polygons, each of which can be scaled independently by the Super FX. Now add to this scene a squadron of enemy ships flying toward you. Each of these ships is also a unified collection of polygons which can be scaled together. The ships, in turn, may be firing missiles at you created from flat sprites, and those missiles are also being scaled as they shoot toward you, and when the missiles explode, the fiery explosions keep growing, because they, too, are being scaled by the inexhaustible Super FX. The result is that a whole screenful of objects can rush toward you, simulating incredible speed. Even more important for the sense of 3-D reality, is the speed of the Super FX's calculations, which are so fast that the scaling appears smooth and continuous.
AROUND AND AROUND

Rotation of objects is another specialty of the Super FX. In Star Fox, not only can large backgrounds be rotated, as with the Super NES's Mode 7, but even sprites can be manipulated individually. Polygons are the most impressive of rotating images, however, because you can spin them around any axis for a true 3-D effect. Backgrounds and sprites, which are flat images, can also be rotated, but only around a single axis. The difference is like that between a 3-D object and a photo. The 3-D object, say a box or dice, can be viewed from any angle. By spinning the cube, you can see every side. With the photo, all you can ever see is the one view. Star Fox uses rotation effects to create its 3-D perspective views. The star ship has free motion within a moving zone, which means you can fly from side to side and up and down within a limited tunnel area that continually scrolls forward. As you swing from side to side, the perspective changes both for stationary objects and enemy ships. These objects are continually rotated to provide the correct perspective from your point of view.

In future games, the Super FX will make possible more realistic 3-D perspectives, as we have seen, but there is another graphic effect that can make just as big an impact. Texture mapping refers to the process of placing picture images on a polygon. Since pictures can be incredibly detailed, the result is a polygon that looks much more like a real object. For instance, the hull of a spaceship might be blackened by streaks of laser scorching, or the hull of a boat might show splintered wood and barnacles. Texture mapped polygons can be rotated and scaled just like regular polygons, the result of which can be highly realistic 3-D objects.

THE LIGHT STUFF

One of the most difficult problems in computer graphics is the representation of moving objects with respect to a light source. Since the Super NES has a huge color palette, it can already generate the hundreds of gradations of a single color required to reproduce light and shadow effects and display 256 of them at one time. With the Super FX, polygons can move and still display shadows and gradations on their surfaces.

If all this is not enough, the Super FX can also enhance collision detection between sprites, calculating many more collisions at a time than the Super NES can do alone. The result is smoother action on the screen. The Super FX also can handle an unlimited number of sprites per scan line. The practical result of this is elimination of character flicker. Even more innovative graphic effects may also be forthcoming once programmers have studied all the possibilities of this powerful new partner to the Super NES.

THE 32-BIT CD BARRIER

The second new technology is the one everyone has been talking about—CD-ROM. As popular as the speculation has been that CD-ROM is the inevitable game format of the future, many misconceptions exist about what it can do and what it cannot do. The myth about CD-ROM is that gamers will suddenly have a totally cinematic game play experience with unlimited interactivity. Even with 500 megabytes of memory capacity, CD-ROMs can't store enough video, audio and game play for that sort of game. The fact is that a single CD-ROM can store only 78 minutes of audio or only five minutes of laser-disc quality video. Even if the video is only partial screen and less than full motion, say ten to 15 frames per second, you can squeeze only about 90 minutes of condensed video onto a disc. The reality of CD-ROM games, therefore, must be something other than bringing Hollywood to your living room.

The biggest single advantage of the CD-ROM format is the size of its capacity in comparison to current ROM chips. Even the 16 megabits of Street Fighter II shrinks to insignificance when compared to 500 mega-
bytes. But the CD-ROM has some disadvantages that can't be ignored. Number one, CD-ROMs are inherently slower than ROM chips. ROMs access data at remarkable speed, CD-ROMs access information thousands of times slower, which can lead to lengthy pauses in game play. Another misconception is that CD-ROM graphics are superior to the graphics of cartridge based games. The limiting factor in this regard is not whether game data is stored on disc or ROM chips, but how good the console is at creating and displaying graphics. If a video game system can display only 16 colors at a time, which is the case of some 16-bit systems, hooking up a CD-ROM will not result in superior graphics. On the other hand, if a system such as the Super NES already has excellent graphics capabilities, the CD-ROM may allow programmers to use graphics in some interesting new ways.

To date, programmers have been creating games for a number of CD-ROM systems, but there has yet to be a standout title that makes use of the CD-ROM in truly innovative ways. Sherlock Holmes: Consulting Detective from Icom Simulations may be the best game so far. In Sherlock Holmes: Consulting Detective, quarter screen video sequences are used when Holmes and Watson are seeking information. You also hear dialogue exchanges, but you can't interact with the characters. In Escape From Cyber City for the CD-I system, you can make choices at branching paths similar to the old Dragon's Lair laser disc game. The uneven pans and awkward control, however, make this action game frustrating to play, and yet it is probably the best of the current CD-ROM action games.

A larger category of games are cartridge games that appear on CD-ROM, perhaps with a new audio track thrown in for flash. Sometimes a company will bundle a number of cartridge games on a single disc to add value. When you consider the cost of a CD-ROM system or accessory, the cheapest of which begins at $300, the issue of quality software becomes very important. Is the extra money really worth a cartridge game with a great sound track and a few minutes of video? Until there are games that truly make use of the strengths of the CD-ROM, most game players will find it difficult to justify the added expense.

THE FUTURE OF VIDEO GAMES

So what does a game have to have before it is worth the cost of buying the hardware? Most game players want to feel as if they are in control of a character or the game environment. In The 7th Guest, which is more of an interactive ghost story than a game, you are in control of your view plus you can point and click to manipulate objects, solve puzzles and gather information. The 7th Guest from Virgin Games is extraordinary in that it combines smooth scrolling animation with an exceptional sound track, video images, computer generated images, and an intriguing story. The 7th Guest succeeds at creating an atmosphere as powerful as a cinematic experience. This direction is one of the most promising for CD-ROM.

As you might imagine, the cost of developing games that include extensive video footage with live actors, digital sound and original music scores is very high. Estimates of the cost of The 7th Guest range as high as $1.5 million, and at least $1 million for Sherlock Holmes: Consulting Detective. Even though the actual disc may be cheaper to manufacture than ROM chips, the extraordinarily high development costs get passed on to the consumer, which is why these PC CD games retail for close to $100.

At Nintendo, the engineers and developers have been studying the problem of creating a CD-ROM accessory that will truly add to the gaming experience. One result is that Nintendo has decided to use a 32-bit co-processor for its CD-ROM player. Although this change delays the introduction of the accessory, the extra processing power will greatly increase what can be done with Super NES games. Like the Super FX, the Nintendo CD-ROM is designed for one reason only—to provide a platform for a new generation of games for your Super NES. Nintendo's philosophy is to offer only products with true value, which means that the hardware must be state-of-the-art and affordable, but also that the games must be suited for the CD-ROM, not just shovel-ware, or cartridge games put on a disc. What those games will be like is anyone's guess, perhaps a mix of types, combining the breathless action of Star Fox with the extraordinary atmosphere of The 7th Guest. Quite possibly this new generation of games will be unlike anything we have ever seen or even dreamed of before.
This paper model is a replica of the polygon object fighter in Star Fox. You can get an idea of how the polygons fit together on the video version of the ship by folding and taping or gluing the model. This model was not intended for flight and may be damaged if thrown.

The rear view shows how the braces hold the wing sections apart. The inset photo shows how pieces 3 and 7 fit together. Tuck the flaps marked A on piece 3 into the open rear cab area of piece 7.

The Star Fox ship model looks as complex as a real spaceship, and it requires patience and care to assemble. Be sure to take your time and double check each piece before cutting it or attaching it.

Before assembly, identify all folding and cutting lines. Make sure cutting lines are solid and not design details.

**THE SHAPE OF THINGS TO COME**

**KNOW YOUR LINES**

- First, assemble the main body pieces: 1, 2, 3, and 7. The wing pieces should be assembled last. The diagram also shows the relationship between pieces.

<table>
<thead>
<tr>
<th>Line Type</th>

<tr>
<td>Joint Line</td>
</tr>
<tr>
<td>Fold Up Line</td>
</tr>
</tbody>
</table>

**HINTS**

The Star Fox ship model looks as complex as a real spaceship, and it requires patience and care to assemble. Be sure to take your time and double check each piece before cutting it or attaching it.

Before assembly, identify all folding and cutting lines. Make sure cutting lines are solid and not design details.
FOLLOW THESE BASIC STEPS

1. Familiarize yourself with the diagrams and model pieces. Each piece is numbered so you can see how it attaches to adjoining pieces. Also note the lettered tabs. These indicate how pieces actually fit together. To form joints, face matching letters together. Finally, know what the different lines indicate. The solid line is to be cut. Detail lines should be left alone. The dotted line indicates where you fold down or away. The dashed line shows where pieces should be connected. The dashed/dotted line should be folded up or toward you.

2. Nintendo Power's expert model makers recommend using the following tools: double-sided tape or glue stick, small scissors, and a ruler.

3. When folding pieces, it is best to fold along the edge of the ruler or straight edge to keep the fold perfectly straight.

4. The wing braces may be the trickiest parts to assemble. Pieces 4 and 10—the wing braces—form into triangles that fit between the main body and upper wing sections. Piece number 10 fits between pieces 7 and 8, while piece number 4 fits between pieces 5 and 7. Take a look at the 3-D illustration to see how these braces fit between the wings. Notice that the long part of the wings extend backwards and the exhaust ports face to the rear.

SOME EXTRA TIPS

- Handle each piece with care and be sure to make folds using your straight-edge or ruler so the folds come out straight.
- The tips of pieces can be bent accidentally. Be careful!
Game evaluations at Nintendo are important business, so important that the in-house evaluation process is strictly limited to trained professional evaluators who are not even allowed to talk to each other about the games. But that is only one aspect of evaluating new games from Nintendo and its nearly 100 licensee companies. The second method goes straight to the heart of how consumers will receive a game by having those same consumers take an early look at Super NES, NES and Game Boy titles, sometimes even games from Europe and Japan. Some of the games are finished products, but sometimes they are still in development. That means that these players get to look at games before the mags get their review copies, except Nintendo Power, of course. If this seems almost too good to be true, in one sense it is.

In a business park near Nintendo's Redmond, Washington headquarters is an office with a modest sign that reads simply, Evaluation Center. Inside, Nintendo gets down to the business of guaging how consumers will receive a game by having those same consumers take an early look at Super NES, NES and Game Boy titles, sometimes even games from Europe and Japan. Some of the games are finished products, but sometimes they are still in development. That means that these players get to look at games before the mags get their review copies, except Nintendo Power, of course. If this seems almost too good to be true, in one sense it is.

The players are selected from a database that includes volunteers from the greater Seattle area, Japan, and Europe. Some of the games are finished products, but sometimes they are still in development. That means that these players get to look at games before the mags get their review copies, except Nintendo Power, of course. If this seems almost too good to be true, in one sense it is.

So what is the Evaluation Center looking for in an evaluator? You may be surprised to learn that you don't have to be a power player. Players of all ages and all play abilities are selected. Since the purpose is to sample the consumer base for statistical analysis, the heaviest concentration of players are males between the ages of ten and 14. That is the age group that buys the most games and plays the most hours. Recently, that base of players has been expanding to include females, both young and adult, and adult males. Game Boy titles, for instance, might have a larger percentage of adult evaluators than NES titles, because more adults have been purchasing and playing the Game Boy system. Currently, the data base holds the names of 1600 volunteers, but that number is growing every week. To get on the list, players must fill out an application and a questionnaire. Minors need to have permission from their parents or an adult, but that doesn't seem to be a problem. Some clever parents have been known to use the Evaluation Center as an incentive for players to earn good grades at school. The questionnaire is designed...
as a video game profile of the player. Applicants are asked what game systems they own, what their favorite games and types of games are, how often they play and how good are their playing skills. The answers to these questions are entered into a data base to help with later analyses.

Finally, it's time for some hands-on fun. Evaluation sessions give players an opportunity to test-drive four new games within two hours—about 30 minutes per game. In a two week period, players attend four sessions, then their names go onto a non-active list for six months so other evaluators have a shot at the games. During the first session, players go through a short orientation where they are introduced to the evaluation system and encouraged to give their honest opinions. For each game, evaluators rate different elements of the game such as graphics, sound, play control and challenge on a scale of one to five. They also have an opportunity to write comments—what they liked or disliked about a game. Finally, there is a questionnaire that measures a game's success by asking questions such as would you buy the game or tell your friends about it?

For every game that undergoes the scrutiny of players, 65 evaluations are completed. The scores from all these evaluations are compiled and averaged, but they can also be broken down by age group and type of player. The results give a good indication of how consumers will respond to a game, or to certain elements of a game. Among other things, the numbers can help Nintendo plan marketing strategies or make changes to a game.

Sometimes the evaluators give Nintendo valuable information without even trying. While the evaluation group is playing games, they may be watched by a second group behind a one-way window. Cameras and microphones are also placed around the room to capture the evaluators' candid reactions as they play. The cameras can zoom in on anything, from the smile on a player's face to the enemy boss on the television screen. The observers can learn a great deal by studying initial player responses. Do they really seem to be having fun? Are they bouncing out of their seats or just staring at the screen? How far do the players get in a game in 30 minutes? This information can be just as important as the numbers in the data base.

Nintendo recognizes that every player has a valid opinion about each game they play. The Evaluation Center is Nintendo's link to the most important part of any video game—the player. At Nintendo, players count!

**Honesty is the most important thing when evaluating a game.**

**ATTENTION SEATTLE PLAYERS!!**

If you live in the greater Seattle area and would like to evaluate games at Nintendo, request an application from the address shown here. Include your address and phone number.

Nintendo Evaluation Center
P.O. Box 957
Redmond, WA 98052

It takes a skilled operator to run all of this high-tech gear. From here you can both hear and see everything. It's a great place to watch the evaluators play!
Evaluations of games at Nintendo aren't limited to the reactions of consumers. Another important means of judging games is to have teams of pro game players make evaluations. Two groups of evaluators review and evaluate every game that arrives at Nintendo HQ. In addition to these two groups, a team of Game Analysts plays Nintendo and licensee games still in development. The comments of the Analysts help programmers focus on possible trouble areas in a game. They also suggest ways to improve games in areas like game control, graphics, and depth of play.

In-house evaluations are used by many departments at Nintendo, but the most familiar use is the Power Meters printed here in Nintendo Power. The Power Meter averages the evaluation scores of the two evaluation groups in eight categories, which are then combined into the four categories of the Power Meter. Since each of these pros has played hundreds of games, their ratings are comparative, or based on their knowledge of how good and poor games can be. They also take into account the norm for different categories of games. For instance, a game like chess won't suffer in its ratings from having simple graphics as long as those graphics are easily understood. The evaluators must also keep in mind what is expected from different types of games and game elements. In a racing game, for example, players expect to start slow and build up speed, like in a real car. Blasting off the starting mark at 300mph would not generally be viewed as a plus by game testers.

Although a Power Meter may rate a game as high or low, it isn't the final word. Remember that the Power Meter number you see is only an average. Some of the evaluators may have rated a game quite highly while others rated it as mediocre. Also, a high rating in a particular category may be more significant for certain types of games. An RPG should have a high rating in the Challenge and Theme & Fun categories. For this type of game, Graphics and Control are secondary factors. As you begin to make your own evaluations, keep in mind that everyone looks at games in different ways. Your Personal Power Meter is just one of many possible results.

HOW A POWER METER IS BORN

The eight category scores below for Super Mario World were combined and averaged to create the four Power Meter ratings:

1. Graphics 4.86
2. Sound 4.95
3. Initial Feel 4.4
4. Play Control 4.8
5. Concept/Story 4.3
6. Challenge-Thrill 4.4
7. Lasting Interest
8. Overall 4.6

FORM YOUR OWN EVALUATIONS

Use the form on the next page to evaluate games yourself. Make as many copies of the form as you need for your files. Fill out the top of the form with the correct information so you can keep track of what games you have evaluated. When you play the game, be thinking of the following categories:

Graphics & Sound—The graphics of a game should add to the game experience. Be sure to notice the background as well and the character animation. Sound includes the background music as well as the sound effects. Do the sounds fit the feel of the game?

Play Control—The play control of a game should be smooth and easy to control. The character should jump when you want him to. This can also include the placement of the buttons. Are the run and jump buttons where they should be?

Challenge—The challenge of a game should fit the level of the player. A good game should challenge game players as well as keep them interested.

Theme & Fun—Does the game have an original theme to it, or is it the same as all your other games? How much fun did you have when you played the game?

After you have played the game, place your scores on the chart in the center of the form. Connect the four scores to make your own power meter of the game.

The Best of Classified Information

Our agents have answered a call from headquarters to compile the best entries from past Classified Information columns and to come up with a few new tips for this special section. What follows are a load of winning codes and strategies for several Super NES, Game Boy and NES hits. Since most subscribers already own the Top Secret Passwords Player's Guide, we have not included any of the Stage Select Codes and Password tricks that appear in that book.

From Agent #536

1-Up Bonanza

There are several places in this big adventure where you can earn a ton of 1-Ups quickly and easily if you know the right moves. Our agents have brought to our attention three of their favorite 1-Up maneuvers in courses that are close to the beginning of the game.

Donut Secret 2

Climb the vine near the beginning of this course and release a Starman at the top. Then run with super speed and leap to catch the Starman in the air. While you're under the invincible influence of the Starman, run quickly to a Block near the end of the course. If you're still invincible when you hit the Block, you'll release another Starman. Collect it and plow through the nearby enemies. By the time you fly through a vertical line of Koopa Paratroopas just ahead of the goal, each of these flying fiends will net you a 1-Up. You should collect at least eight 1-Ups using this maneuver.

Vanilla Secret 2

This course is loaded with Koopa Troopas. Our agents have found a way to temporarily turn these enemies into gray Coins that can be collected for 1-Ups, 2-Ups and 3-Ups. After the midpoint, you'll come across a pit of Spinnies. There are four floating Blocks above the pit. Walk to the edge of the pit and hit the second Block from the left. A gray P-Switch will pop out of the Block. Pick up the P-Switch and carry it to the left. Then drop the P-Switch between two purple Pipes and stamp on it. All enemies will become gray Coins for a short time. Run to the left at super speed and collect the newly changed Coins. By the time the Coins turn back into enemies, you'll have earned from 40 to 50 1-Ups.

Vanilla Fortress

This underwater stronghold is filled with odd sea creatures. You'll encounter a pair of Bony Beetles in front of the door to Reznoir's chamber. Tread water near the door and stomp the Beetles whenever you have a chance, without hitting the ground. You'll earn a growing number of points for each stomp and, eventually, 1-Ups.
The Ultimate Match

News of a code that allows players to face off with each other using twin fighters has spread quickly throughout the video game world. If you haven't heard of this cool feature, here's how to set it up. When the Capcom logo appears briefly before the title screen, press the direction keys on the Control Pad and the Controller Buttons in the following order: Down, R. Up, L, Y, B. When the code is entered, a tone will sound and the title screen will appear with a dark blue background instead of the usual black background. Enter the V.S. Battle mode for two-player simultaneous action and select your fighters. Both players will be able to control nearly identical fighters with a slight color difference in order to tell them apart. For the first player to complete his or her character selection, pressing the Start Button changes the color of the fighter while pressing the A Button keeps the color the same. The color of the other fighter is made to be different from the first fighter when the player presses either Start or A to complete the selection.

While this logo is on the screen, press Down, R. Up, L, Y and B. You'll know that the code is entered correctly if the title screen is blue.

With this super code, you can set up a two-player match using twin fighters for a true test of player power.

Computer-Controlled Duel

The twin fighting code allows battles between identical fighters in a two-player game. Our agents have discovered a way to allow a player-controlled fighter to enter a battle with his computer-controlled twin. Variations of this maneuver work for Ryu and Ken. We'll explain the Ryu Vs. Ryu matchup first. Start a single-player game and choose to control any character except Ryu. Continue the game until the fight comes to Ryu's dojo.

Then press the Start Button on Controller II to bring in a new challenger and, again, choose to control any fighter other than Ryu. During this match of player-controlled fighters, let each of the characters win one of the first two battles. Then, have the third and fourth lights end in no-contact draw games by letting the time run out. After the final match, you'll have the option to continue the game. Press the Start Button on Controller I, then select Ryu as your fighter. You'll fly to Ryu's dojo and battle his computer-controlled double.

The setup for the Ken Vs. Ken match is similar to that of the Ryu Vs. Ryu match. Start a game with any character other than Ken. Once at Ken's stage, press the Start Button on Controller II to bring in a new challenger. After the two fighters trade victories and draw the last two fights, you'll have the option to continue the game. Press the Start Button on Controller II (not Controller I as in the previous maneuver) and choose Ken as your fighter. In the Player Two position, your character will challenge a computer-controlled Ken look-alike.
From Agent #408

The Best Offense...

Special offensive moves that can be made by four of the Street Fighter II challengers turn out to be good defensive moves when used against the flying Sonic Boom, Yoga Fire and Ha Dou Ken attacks. These fighters are Ryu, Zangief, Dhalsim and Chun Li. Take a look at the tips below for all the right moves.

RYU

Press Right, Down, then Down and Right along with a Punch Button to pull off the powerful Dragon Punch.

ZANGIEF

Hit Zangief's three Punch Buttons simultaneously to send him spinning and allude the Sonic Boom.

DHALSIM

Press Down and hit a Kick Button to slide under any airborne attacks.

CHUN LI

Press Down for two seconds, then press Up and press a Kick Button. Your Inverted Hurricane will blow away the attack.

99 Lives and More

Here's how to instantly increase the power of your Pod and select as many as 99 lives in reserve. When the starting level selection screen appears, press and hold the L and R Buttons, then press the Start Button. The game setup screen will appear. Adjust the options on the screen to your liking, then press the Start Button to begin.

Press and hold L and R. Then press Start.

Cyberscape!

The Game Boy version of Faceball 2000 includes a game option called Cyberscape which challenges you to find flashing exits in Smiloid-filled mazes. The Super NES version offers a more action-oriented game called Cyberzone. Our Faceball 2000 contacts have clued us in on a way to choose Cyberscape on the Super NES version of the game as well. When the screen which allows you to choose the number of players appears, press and hold the L and R Buttons along with Left on the Control Pad, then press the Start Button. The interface screen will appear, offering Cyberscape as an option.

Pod Farming

The Faceball 2000 pros have developed a Cyberzone technique called "Pod Farming" which creates Power-Up-carrying Pod Drones. In any area that contains Yellow Smiloids or Gremlins, one Pod Drone will appear for every easy-to-defeat character that you touch. By firing on the flashing Pod Drones that appear, you can earn armor, Coins and life-replenishing Power-Ups.
**From Agent #711**

**Longer Lifeline**

Our agents have found a way to max out your lifeline in Stage Three of Prince of Persia for the Super NES. This Persian prison stage is made up of two large sections. By collecting the pair of lifeline-extending Bottles in the first section and making your way to the second section, you can earn a password which accounts for the longer lifeline and marks your starting position at the beginning of the stage. When you re-enter the game via the password, you can collect the Bottles again and earn another password when you reach the second section. Continue this pattern until your lifeline is at the desired length or at the maximum of 15 Bottles. Our agents warn that collecting both Bottles and exiting the first section requires at least two-and-a-half minutes. Don’t spend too much time with this trick, or you won’t clear Stages 4-20 in the allotted time of two hours.

---

**From Agent #312**

**Ships-A-Plenty**

By keying in a quick and easy code, you can multiply your ships in reserve nearly tenfold. When the title screen appears, press and hold Left on the Control Pad and press the A Button three times. Then press the Start Button. You’ll begin the game with 29 ships in reserve.

---

**Extra Credits**

While the title screen for this space adventure is showing, you can increase your credit total by pressing the X Button quickly and repeatedly. You should be able to build up the total to as many as eight credits. When the credits are up, press the Start Button before the title screen disappears, or the credit total will go back to four.

---

**Instant Power-Up**

In the tradition of the other Gradus games, you can earn Power-Ups instantly in this game through a special code. In the middle of the action, press the Start Button to pause the game, then press the Control Pad direction keys and the Controller Buttons in the following order: Up, Up, Down, Down, L, R, L, R, B, A. When you press Start to resume the action, your ship will be loaded with extras.
**From Agent #312**

The Konami Code

The programmers of Konami games created a long-standing code which makes for special circumstances in several games. In order to enter the code, you must press the Control Pad direction keys and the Controller Buttons in the following order: Up, Up, Down, Down, Left, Right, Left, Right, B, A, Start. You can use this code to your advantage in the games listed below.

**Contra**

Key in the Konami Code when the Contra title screen appears. You'll begin the game with 30 fighters in reserve. Thirty more fighters will appear when you continue.

**LifeForce**

By entering the Konami Code on the LifeForce title screen, you will extend your ships in reserve to a total of 29. You'll need the extra support in challenging areas.

**Gradius**

In the midst of the action, press Start to pause the game, then enter the Konami code. Your ship will be loaded with special Power-Up items.

**Nemesis**

The Konami code does for Nemesis what it does for Gradius. Pause the game, enter the code and blast through space with extra weapons.

**T.M.N.T.—Fall of the Foot Clan**

In this first Turtles adventure for Game Boy, get a one-time energy recharge by pausing the action and entering the Konami code. Your energy meter will be full.

---

**From Agent #010**

Ten Fighter Code

For this Contra sequel, a new code was created which allows for ten fighters in reserve. When the title screen appears, press the Control Pad direction keys and the Controller Buttons in the following order: Right, Left, Down, Up, A, B, Start. When the game begins, you'll have extra fighters to use in a pinch.

**From Agent #614**

Unlimited Mice

If you're tired of falling into Tom's mousetraps, there's a way to give yourself unlimited chances to foil his mischievous plans. The game has two title screens. Make sure that you key in the following code when you see the screen that shows an illustration of Tom and Jerry. Press the Control Pad direction keys and the Controller Buttons in the following order: Right, Right, Up, Left, Up, Right, Down, B, A, Select. Then press the Start Button twice to begin the game. The meter at the bottom of the screen will indicate that you have 99 lives in reserve. The number will never decrease, even when it appears that you've lost a mouse.

---

**JANUARY 1993**
From Agent #002

Extra Car Roulette

With a little luck, you can begin your Super Spy Hunter mission with 12 cars in reserve. When the title screen appears, press and hold the A, B, and Select Buttons, then press the Start Button. A series of numbers will fly by like the numbers on a roulette wheel. When the digits stop moving, the number in the center of the screen will indicate how many cars in reserve you have been awarded. The highest number on the wheel is 12. Keep trying until you’ve reached the desired number of cars.

From Agent #740

Formula One Slots

In another fast car/game of chance tie-in, this Formula One racer features a slot machine event before the Monaco race if you know the secret word. Change your racer’s name to “CASINO” before you reach Monaco. Just prior to your Monaco race, you’ll step into the F1ROC Casino and play Slots for extra cash. If you want a guaranteed $10,000 to invest in your car, you can change your racer’s name to “SETAUSA” at any point in the game. You’ll start the next race with a very large account.

From Agent #289

Configuration Mode

You can increase your chances for success in this Game Boy adventure by keying in a code. At the title screen, press Down on the Control Pad along with the Select and B Buttons, all at the same time. The Configuration Mode will appear. In this mode you can change the number of hits Kirby can withstand, add to the number of lives in reserve, and listen to the sounds of the game.

Bonus Game Select

There are several areas in this adventure where you can play a bonus game to earn an energy recharge. You can practice these games before you start playing by keying in a code on the configuration screen. Press the A, B and Select simultaneously. A question mark will appear in addition to the five stage choices. Select the question mark for the option to play any of the bonus games.
As wicked Wario reigns over Mario Land, our Koopa-crushing hero searches for the Six Golden Coins in a quest to reclaim his kingdom. What Mario may not know is that there are six secret areas hidden in the zones of Mario Land. This Super Power Club article reveals the locations of these special treasure-filled stages.

Take a tour of the underground and find out how six hidden exits lead to secret stages in the outskirts of five Mario Land zones. You'll discover Power-Ups, 1-Ups and Coins-a-plenty in these long-forgotten lands. Their locations are shown in the pages ahead.

The sunken sub in the Turtle Zone is a maze of pipes and narrow passages. Weave your way through the maze and avoid traps to reach the hidden exit to an island off the Mario Land coast.

A powered up Mario can't fit in the very narrow hidden tunnel. If you want to reach the other side and move on to the secret stage, you'll have to cut our hero down to size.

When you reach the secret island stage, you'll see that Wario has spelled his name in blocks. You can turn the "W" into an "M" by jumping on the right places.

When you reach the secret island stage, you'll see that Wario has spelled his name in blocks. You can turn the "W" into an "M" by jumping on the right places.
Solve more Mario Land mysteries. There are doors to secret stages in two Pumpkin Zone courses. You'll find them by exploring out-of-the-way areas and using special Mario moves. Once this pair of secret stages has been cleared, the markers on the Pumpkin Zone map will produce menacing spooks.

The ledge high above the Goal in the third Pumpkin Zone course leads to a 1-Up secret stage. You can reach this special area by jumping from the stairs and floating to the ledge as Buzzy Mario.

This Coin arrow should give you the clue that there is something special above the Goal.

By breaking the Blocks in this secret stage, you can collect several 1-Ups.

Break the Blocks that obstruct this Pupa with Fireballs or a spinning pump.

You'll encounter this pod shortly after you ring the midpoint Bell in the second Pumpkin Zone stage. Sink into the water and jump on a secret stage.

Pick up a Carrot at the beginning of this stage and fly through a cloud of Coins.

Avoid the spooks as you cross this gap or you'll be grounded.
As Bunny Mario, you can reach a special exit in the second Tree Zone course where it branches off into the roots and tall grass. If you don't have Bunny Ears, look for a Carrot in a very deep section of the stage. Take the Carrot, then backtrack and search for the area pictured below.

By walking through the hidden exit in the first course of the Macro Zone and clearing the secret stage, you can skip directly to the final course. You'll be facing the zone's leading rat in no time. Stomp it three times and claim the Macro Zone Golden Coin.
You'll rocket to a secret stage in the first Space Zone course by finding a way to float to an exit high above the Goal. Your spacewalk begins right after the midpoint Bell. Jump up to reveal hidden Blocks, then follow a floating Coin trail to the exit.

Coins and 1-Ups are abundant in this low gravity secret stage. Collect what you can, then float to the exit.

You'll find a hidden Block shortly after you ring the midpoint Bell. Jump onto the Block and continue your climb to the Coins.

The Blocks directly above the Goal can be broken, but they don't hide items or an exit.

Dear Friends,

Mario Land is full of surprises and special items. Take your time and explore all of the courses and zones carefully.

Your Pal, Mario
TAKE A SLAP
WITH THE
SAN JOSE SHARKS

GRAND PRIZE:

- Win a trip to San Francisco to see the San Jose Sharks take on the LA Kings
- Take to the ice and take a slap shot with the Sharks
- Take home a hockey stick autographed by the pros
- Visit Electronic Arts and meet the designers of NHLPA Hockey '93
Please answer the following questions on the postcard provided below, then enter our Player's Poll Contest by sending it in!

A. How useful is the game data now included in Now Playing?
   1. I like to read the ratings and find out about game memory before I decide to buy a game
   2. The data is interesting to read, but it doesn't influence my game purchases
   3. I don't understand the data
   4. I don't read the data

B. How often do you send in your Player's Poll card?
   1. Every month, no matter what the prize is.
   2. Most of the time.
   3. Once in a while, only when I really want the prize.
   4. Never

C. Which of the following would you like to see in future issues?
   1. More technical articles
   2. Stories about readers
   3. Comics
   4. Puzzles and quizzes
   5. Art contests

Please use the game titles on the back of this card to answer the following questions:

G. Indicate numbers 1-74 (from list on back of card)  1.   2.   3.   4.   5.

H. Indicate numbers 75-126 (from list on back of card)  1.   2.   3.   4.   5.

I. Indicate numbers 127-205 (from list on back of card)  1.   2.   3.   4.   5.

J. Trivia Test Answer: 

Answers to the Player's Poll - VOLUME 44

Washington State residents add 8.5% sales tax (multiply subtotal by 0.085). Other valid while supplies last! Allow six to eight weeks for delivery. Enclose this card along with your payment or credit card information in a stamped envelope and mail to the address: Nintendo Power Magazine P.O. Box 97062 Redmond WA 98073-9762.
Official Contest Rules

To enter, either fill out the Player’s Poll response card or print your name, address, telephone number, Vol. 44 and the answer to the trivia question on a plain 3 1/2" x 5" card. Mail your entry to this address:

Nintendo Power
Player’s Poll Vol. 44
P.O. Box 97062
Redmond, WA 98073-9762

One entry per person, please. All entries must be postmarked no later than February 1, 1993. We are not responsible for lost, stolen or misdirected mail. On or about February 15, 1993, winners will be randomly drawn from among all eligible entries. By accepting their prizes, winners consent to the use of their names, photographs, or other likenesses for the purpose of advertisements or promotions on behalf of “Nintendo Power” magazine or Nintendo of America Inc. without further compensation. Prizes are limited to one per household.

Chances of winning are determined by the total number of entries received. The ratio of prizes to entry cards distributed is 61:1,000,000. No substitutions of prizes is permitted. All prizes will be awarded. To receive a list of winners, which will be available after February 28, 1993, send your request to the address above.

GRAND PRIZE TRIP: Nintendo will provide tickets to an LA Kings/San Jose Sharks game and arrange air travel and accommodations for the grand prize winner and one guest. If under 18, the winner must be accompanied by a parent or legal guardian. The winner must also provide written release to Nintendo of America Inc. Estimated value of the grand prize is $3000. Exact date of the trip is subject to final determination by Nintendo of America Inc. and to accommodation and airfare availability. Some restrictions apply. This contest is not open to employees of Nintendo of America Inc., their affiliates, agencies, or immediate families. Void where prohibited by law. This contest is subject to all federal, state, and local laws and regulations.
In the first Top 20 of 1993, Kirby's Dream Land made a skyrocket leap to the top of the Game Boy chart. Street Fighter II and Super Mario Bros. 3 both held on to the top spots into the new year. It looks like it's going to be a HOT year!

SONIC BLASTMAN

Company: Taito
Suggested Retail Price: Not Available
Release Date: February 1993
Memory Size: 8 Megabits
Game Type: Super hero street-fighting action

The Hero of Justice knocks heads and boot backsides with an incredible array of punches, kicks, spin moves and super hero techniques. See the review in this issue for photos and game play tips.

THE MAGICAL QUEST STARRING MICKEY MOUSE

Company: Capcom
Suggested Retail Price: Not Available
Release Date: January 1993
Memory Size: 8 Megabits
Game Type: Cartoon action with Mickey Mouse

Capcom and Disney have created a graphically stunning game starring the world's most famous rodent. Mickey Mouse rescues Pluto from wicked Emperor Pete. See all the magic in this month's expanded coverage of this Super NES masterpiece.

EQUINOX

Company: Sony
Suggested Retail Price: $54.99
Release Date: February 1993
Memory Size: 8 Megabits
Game Type: 3-D adventure mazes where you must solve and survive the riddles of each room

If you enjoyed Solstice (NES) or Altered Space (Game Boy), you're sure to love Equinox. The long-awaited title puts you in a big world with lots of mazes, rooms and danger. This issue's review covers many of the early stages. In all, there are seven kingdoms with up to 107 interior rooms.
The graphics really standout, but the game is just as solid as you would expect from Activision. Mickey manipulates blocks, changes clothes, jumps, swims, climbs and squeaks.

If there is a negative in this game, it might be that it is too easy on the Normal mode. Only on the Hard mode is it a real challenge.

SHANGHAI II

- Company: Activision
- Suggested Retail Price: Not Available
- Release Date: February 1993
- Memory Size: 4 Megabits
- Game Type: Mah-jongg tile matching game with 13 layouts

So what exactly is Shanghai? It's not exactly a puzzle and it isn't really a strategy game. Each tile in the Shanghai stack has a character on its face and the only way to remove it is to find another open tile with the same character showing. Eventually you will reduce the stack, then move on to more difficult formations.

The greatest innovation in this game is the option to change tile sets. Instead of the difficult-to-recognize Mah-jongg symbols, you can select easily identifiable symbols such as national flags or sports poses. The complex stacks and deceptive simplicity of the game make Shanghai II one of those games you just can't stop playing.

Some of the character sets, such as the Mah-jongg default set, are awkward to use because many of the characters resemble each other. Also, the 3-D view doesn't always clearly show which tiles are on top or closed in.

SPINDIZZY WORLD

- Company: ASCII
- Suggested Retail Price: $89.95
- Release Date: February 1993
- Memory Size: 4 Megabits
- Game Type: Maze action/puzzle in 32 levels

Spindizzy World is a complex puzzle/action game that makes nuclear physics look like child's play. The complexities of the many levels and warps can really make you dizzy. As a spinning top, you have a limited amount of fuel with which to complete a world. Obstacles like hills and platforms make moving around this geometric world very tricky, and if you fall off the edge, you'll lose some of your fuel. Some stages have enemies that you must evade, like the voracious Pak Attack critters.

Controlling the "Top" vehicle feels natural and the 3-D graphics really seem to have depth. The game also has depth of play in its 32, increasingly difficult worlds.

The most difficult, and troublesome, part of the game is at the start when you have to choose various options. The selection process makes very little sense.

CHUCK ROCK

- Company: Sony Imagesoft
- Suggested Retail Price: $54.99
- Release Date: January 1993
- Memory Size: 8 Megabits
- Game Type: Side-scrolling comic action

Chuck Rock is a big-bellied hero from the dawn of history who has a handful of troubles. His only defense against a wide world of strange, colloquial foes is his stomach. He doesn't eat the creatures, he bums them with his potbelly. Chuck is an expressive, low-brow kind of guy. There are hidden areas and items to find everywhere in this graphically whacky but cool world.

- The graphics and animation are super, especially the many outrageously weird enemies.
- The game play is very basic—jump and bump, levels and bosses.

THE BRAINIES

- Company: Titus
- Suggested Retail Price: $54.99
- Release Date: February 1993
- Memory Size: 4 Megabits
- Game Type: Moving character puzzle

In The Brainies, you must think and act fast to place the characters on matching color gadgets within a short period of time. That may sound easy, but the puzzles soon become complex and require many moves to achieve your goal. Since time is also a factor, you'll have to identify the problem quickly, then act with speed. The Brainies themselves are a bunch of furry troublemakers who mess with your brain. In all, there are 100 levels of play and passwords to take you back to your highest level of achievement.

- Puzzle lovers will enjoy a different type of challenge than Tetris. Quickness is important, which makes the game more challenging. The 100 levels should keep players busy for a long time.
- The demo display of each level that appears before you begin the level doesn't allow you enough time to identify your goals before the clock starts counting down. Also, the cursor doesn't always click off when you press the Controller.
WORDTRIS

Company: Spectrum Holobyte
Suggested Retail Price: $54.95
Release Date: January 1993
Memory Size: 4 Megabits
Game Type: Tetris-type word-spelling puzzle

As the letter blocks fall, you must arrange them so they spell words of up to nine letters. If you don't spell anything, the blocks start stacking up until the screen is full. To make things interesting, bombs and acid can destroy letters that are in the way. The levels quickly get mind-bendingly difficult.

The challenge of this game is exceptional and the dictionary of 50,000 words catches all but the most obscure words.

The speed of the falling blocks increases too quickly between levels, so that by level F or G, it is almost impossible to keep up with it.

IMPERIUM

Company: Vic Tokai
Suggested Retail Price: Not Available
Release Date: January 1993
Memory Size: 8 Megabits
Game Type: Vertical-scrolling shooter

This arcade-style shooter puts you in the role of a giant attack robot fighting against the evil master robots. There's nothing new in the theme or play, but it is a good example of this genre of game.

Unlike many vertical shooters, Imperium gives you a Life Meter, allowing you five hits before you're destroyed. You also have the option to use different weapons, including a salvo of powerful missiles.

A number of the enemies match the color of the backgrounds, making them difficult to see and blast.

CHESTER CHEETAH

Company: Kaneka
Suggested Retail Price: Not Available
Release Date: January 1993
Memory Size: 8 Megabits
Game Type: Side-scrolling action platform game

Chester of Frito-Lay fame is the coolest of cool cats and the funniest of funky felines. He's too cool to fool. He hops and bops to his own rhythm in a psychedelic world while tracking down Righteous Kitty, who is being held captive. Chester uses his tail as a weapon, bouncing off enemies like a spring-loaded Tigger. But that's just the beginning. He can jam on guitar and blow the bad guys away with his sounds. The other animals in Chester's world are also pretty with it: turtles on roller skates, dogs on steamrollers, fish with sunglasses.

TOP RATED ANIMATION Cool Power-Up items like guitars and shades
Some challenging jumping action. Great music!

Many of the enemies require multiple hits, which really slows down the action. The hit detection is very sensitive. Even if you are slightly off-center when you stomp an enemy, you will take a hit.

GODS

Company: Mindscape
Suggested Retail Price: $54.95
Release Date: February 1993
Memory Size: 8 Megabits
Game Type: Fantasy action

You are the toy of the gods, thrown into a maze from which mortals never escape. In true barbarian fashion, you must attempt to battle your way past a host of hideous beings for the amusement of the diabolical deities. The most interesting part of this game may be its Artificial Intelligence. The game can detect when you're having trouble and it will give you easier challenges and puzzles. On the other hand, if the game detects you cruising through the stages, it will throw greater challenges in your path. There are three cities each with multiple levels, making the game fairly deep. Euro-action fans voted this one a winner as a PC game.

With its special AL, this game should prove to be a challenge for everyone. Great looking monsters make up for repetitious backgrounds.

Some players may find the controls awkward at first. Instead of having a jump button, you press Up and either Left or Right on the Control Pad.

MEGA MAN 5

Company: Capcom
Suggested Retail Price: Not Available
Release Date: January 1993
Memory Size: 4 Megabits
Game Type: Robotic hero side-scrolling action in ten stages

Mega Man is back again. An army of robots led by the mysterious Protoman is bent on destroying the world. Is Protoman the leader, or is a more wicked scientist behind it all? Read this month's extended Mega Man review to get the big picture.

As in the previous Mega Man games, the control is outstanding. The variety of weapons is as inventive as ever. The graphics are great and the enemies are cool.
Unless you'd just like to see more variety in the game play, characters or story, there's really nothing bad about this game.

**THE JETSONS: COGSWELL’S CAPER**

Company: Taito
Suggested Retail Price: Not Available
Release Date: January 1993
Memory Size: 3 Megabits
Game Type: Comic action, based on the classic cartoon from Hanna-Barbera.

The first NES action game starring the Jetsons includes all the famous characters from the TV cartoon and lots of new enemies. This month's review takes you behind the scenes.

- Excellent graphics and good game control make this game very inviting to both action and cartoon buffs. The designers also added some fun elements like the Antigravity Button that flips your perspective.
- There is no way to skip through the dialogue balloons that you encounter throughout the game, and that slows things down.

**R.C. PRO-AM 2**

Company: Tradewest
Suggested Retail Price: Not Available
Release Date: January 1993
Memory Size: 2 Megabits
Game Type: Overhead view, course racing with customized vehicles.

The sequel to R.C. Pro-Am was programmed by RARE, and it's a rare treat indeed. Excellent control, money prizes and upgradeable vehicle components send this game first past the checkered flag.

- Being able to choose the items you want to boost the power of your vehicle adds an element of strategy to the game.
- Some of the enemy vehicles that appear, like the airplanes that drop bombs, give you very little time to adjust and dodge. The result is that you can lose a race without doing anything wrong.

**GOAL! TWO**

Company: Jaleco
Suggested Retail Price: Not Available
Release Date: January 1993
Memory Size: 2 Megabits
Game Type: Soccer

International soccer is the biggest sport in most nations of the world. One or two players can experience some of that with Goal! Two. The 24 teams can be played in a tournament or in single matches. The characters are really quite large and well-animated for an eight-bit game.

- The 24 teams offer a lot of different styles of play. Options to choose lineups and formations are a nice feature.
- The angle of the field can make it difficult for you to tell where you are in relationship to the goal.

**THE YOUNG INDIA JONES CHRONICLES**

Company: Jaleco
Suggested Retail Price: Not Available
Release Date: January 1993
Memory Size: 2 Megabits
Game Type: Levels/bosses, side-scrolling with mixed action

Based on the successful ABC TV series from Lucasarts, this game begins with Indy reliving a few of the episodes, then departs on its own course in the final stages. Indy begins by fighting in the Mexican Civil War, then goes to Europe where he winds up fighting in WWI. During the game, he must find items and defeat enemies, search out hidden areas and gather information during cinema scene breaks between action stages.

- For the most part, the game remains true to the story. The variety of action, which includes an aerial dog-fighting stage, keeps things interesting.
- The graphics are mediocre and the character control can be awkward at times. The game doesn’t do justice to the show.

**ROCKY AND BULLWINKLE AND FRIENDS**

Company: THQ Games
Suggested Retail Price: Not Available
Release Date: January 1993
Memory Size: 2 Megabits
Game Type: Cartoon action starring moose and squirrel

Rocky and Bullwinkle set off on multiple adventures from Frostbite Falls. As you might imagine, their progress is plagued by a persistent Boris and Natasha. Bombs seem to be the weapon of the day, but Bullwinkle can also use his antlers to butt enemies.
CRASH TEST DUMMIES

- The cartoon style of graphics is well-suited to the game.
- Awkward control makes this game frustrating to play.

| Company          | UN

This shooter has earned quite a reputation in Europe and elsewhere as a hot action game. The five levels and bosses are tough, but there is help. You can earn money and buy better weapons at shops as you progress. It can be played as a two-player alternating game or by one pilot. Fans of Gradus will feel right at home attacking the evil Phadus Empire.

BATTLESHP

- The humor in this game is great, as are the graphics. If you’re a fan of the characters, you’ll get a kick out of it.
- The game play is not very deep, which means that you may not find it very challenging, or you may finish it in a short time.

### CHART KEY

#### PLAY INFO
- Games are made to be played with as many as eight players. Some also employ a battery or password to save game play data.
- **#P** = NUMBER OF PLAYERS
- **S** = SIMULTANEOUS
- **A** = ALTERNATING
- **BATT** = BATTERY
- **PASS** = PASSWORD

#### POWER METER
- The Prs at Nintendo HQ rate each new game. Ratings are from 1 (poor) to 5 (excellent) in four different categories:
  - **G** = GRAPHICS AND SOUND
  - **P** = PLAY CONTROL
  - **C** = CHALLENGE
  - **T** = THEME AND FUN
Generations of Americans have wanted to follow the yellow brick road into the fantasy land of Oz where anything seems possible. Thanks to Seta, and newcomer Super NES developer Manley & Associates, that dream will come true this summer with the release of The Wizard Of Oz.

The developmental version reviewed by Pak Watch had most of the elements in place, but small changes will probably take place before the final version is ready. The game is action-based. You can play as Dorothy, the Scarecrow, the Cowardly Lion or the Tin Man. More than 40 stages in all offer jumping and fighting action, plus hidden items, special puzzles, secret rooms and a host of enemies. The graphics are as rich as Magical Quest Starring Mickey Mouse—both the backgrounds and characters. The music, including four songs from the movie soundtrack, was also striking. The point of your journey, as in the movie, is to reach the great and powerful Oz. To get there, you'll have to pass through four worlds, collecting ticket pieces that will allow you passage into the Emerald City. Jumping and fighting skills are essential, but there are also elements of strategy and adventure. After a look at this Pak, you may be thinking, there's no place like Oz.
It's a snowy night in ancient Scandinavia when, suddenly, an alien spaceship appears and beams up three unlikely passengers. Erik the Swift, Olaf the Stout, and Baleog the Berserker. These Lost Vikings must battle and out-wit their alien captors, then survive in historical and prehistorical limes in their efforts to get back home. Each of the Vikings has a special ability that must be used in concert with the other Vikings to overcome obstacles and enemies. This is where the fun comes in. For instance, you might have to use Olaf to block an enemy with his shield while Baleog shoots an enemy with his arrow. You can also use items. There's plenty of dialogue, too, and much of it is a blast. The two-player mode allows you each to play your favorite Viking while sharing duty with the third. These irreverent Vikings from Interplay should arrive later this Spring.

FCI and Origin have combined once again to bring the world of Britannia to you, this time for the Super NES in Ultima VI: The False Prophet. As the Avatar, you and your party of loyal helpers, Shamino, Iolo and Dupre, set out on a sprawling RPG adventure. The overhead view works much better with the Super NES graphics than in some of the earlier Ultima games, but the control is much the same, which is to say it is a bit awkward. Luckily, control isn't a big issue in RPGs. What really counts is the depth and breadth of the game. The depth of the story and the familiarity of the characters is what will make this game appealing to RPG fans when it appears this Winter. FCI told Pak Watch that another five titles in the series are planned for the future even though Origin has joined with Electronic Arts.

Hi Tech's series of Tom & Jerry games will expand to include a Super NES title starring the TV cartoon cat and mouse this Spring. Pak Watch reviewed a very early version. This action game is expected to be more like the original NES game in that Tom will be the boss character at the end of each stage. Also in the news from Hi Tech is the final version of Hunt For Red October.
**ADDAMS FAMILY IN PUGSLEY’S SCAVENGER HUNT**

The ooky, kooky family is back in another Super NES action game from Ocean. This time the game is based loosely on the new TV cartoon. In fact, many of the areas include characters taken directly from the TV series. Pugsley is the action character in this outing, but the control is virtually identical to the first Addams Family game—that means lots of jumping and bopping. The graphics are fantastic, and so is the music.

Although this Pak Watcher missed the little touches like the finger-snap from the first game. But there are lots of new touches that keep this game fresh. Look for it in the next month or two.

---

**ZELDA FOR GAME BOY**

The rumors have been flying around for years that Nintendo was working on a Zelda game for Game Boy. Those rumors will become reality this Spring when the so-far untitled Zelda IV hits the stores. Pak Watch recently took a look at a 70% complete version of the game, and wow! The graphics, although monochrome, are based on The Legend of Zelda—A Link To The Past, but the music and many of the characters are derived from the first Zelda game. Link’s world in this 4 Megabit Battery Pak is said to be as large as A Link To The Past. Link himself has some new moves and tools. The story so far puts Link in a world of nightmares and dreams. You’ll definitely be hearing more about this one, although it may go through a name-change.

Nintendo is also working on a new Kirby game, this time for the NES, and Vegas Stakes, in which you are a high-roller trying to turn chump change into millions.

---

**DARKWING DUCK**

It’s time to get dangerous one more time with Disney’s super hero who goes quack in the night. Capcom has plucked this F.O.W.L. crime fighter straight from the NES and put him into Game Boy. The games are very similar, and that also means top quality graphics and a lot of variety in the game action, from climbing up chains to jumping over enemies. Capcom expects to release Darkwing Duck by February or March.
When Ripley crash lands on a maximum security work-correctional facility after her escape from the doomed colony in the movie Aliens, the horror begins all over again. Alien 3 from Acclaim departs from the standard movie-based side-scrolling action game by using a top-down view. Ripley must search out and find weapons to use against a new and growing colony of aliens. Very effective cinema scenes add to the adventure. The NES version should be available this Winter also, but it will be a side-scroller.

**ROLLERBLADE RACER**

Rollerblade Racer from Hi Tech is the safe way to get into in-line skating. This NES game pits your avoidance skills against both still and moving obstacles along the street. Extra-cool moves like the back-scratcher are tricky to pull off, and sometimes it’s tough to see things like cracks in the road that will land you on the pavement. Also coming this Winter from Hi Tech is Mickey’s Safari in Letterland. This game is for preschoolers still learning the alphabet and simple reading skills. Mickey Mouse looks great, but don’t expect any sort of challenge from the edutainment Pak. It is strictly for the youngest players.

**ZEN: INTERGALACTIC NINJA**

Konami’s answer to Ninja Gaiden is Zen, a ninja who roams the universe in search of evil polluters. The most striking thing about this game is the control of the action character, which is excellent. Moving through horizontal and vertical stages, you’ll jump, run, climb, swing and fight. Although Zen doesn’t do anything new in a gaming sense, what it does do, it does very well. Konami’s second NES title this Winter is Tiny Toon Cartoon Workshop, an animation program that includes characters, dialogue and music. Your job is to put together your own five minute cartoon. There’s also a second Tiny Toon adventure on the way.
The new year will be getting off to an incredible start with some of the hottest titles ever scheduled to appear in the first six months. Included in this hit parade will be comic and cartoon super studs, Superman and Taz from Sunsoft. The Super NES Taz-Mania will be unlike any other game of the same name since it will make extensive use of Mode 7 effects. Picture if you will a game that combines the cartoon graphic quality of Road Runner's Death Valley Rally with the 3-D perspective view and speed of F-Zero—that's Taz-Mania, and this Pak Watcher is drooling over the very thought of it.

Konami’s graphically astounding duo, Batman Returns and Tiny Toon II, should make it into the stores by this March and April. Our sources at Konami tell us that Batman underwent some extra delays when the development team decided to add more depth to the game play. Can’t blame ’em for that. One of the areas that look particularly cool is the driving sequence. Against a stunning backdrop of Gotham City, you’ll race the Batmobile over 3-D terrain like that in Top Gear Tiny Toon. Buster Busts Loose is an incredible romp with outstanding graphics, a speedy Buster, inventive bonus stages and loads of fun.

In other Super NES news, Spectrum Holobyte is moving into the big time with Star Trek: The Next Generation. The action/adventure game includes the main characters from the hit syndicated show with an all-new plot. We expect to see this game early next Fall. PC game designer/ genius, Syd Meir, is said to be putting the final touches on Railroad Tycoon for Microprose. The game of railroad entrepreneurship is one of the best strategy simulations this Pak Watcher has ever seen. Another true-to-life simulation is SimAnt, the Maxis creation in which you control an animated ant colony. The Word from Acclaim is that they have signed up hockey star, Brett Hull, and have begun work on a Super NES hockey game with Brett’s help. The Super NES version of American Gladiator’s from Gametek floated across the Pak Watch desk recently. The events of skill and strength made famous on the syndicated TV show are included, as are the stars of the show. Gametek’s Kawasaki Caribbean Challenge won’t be out at least until mid-year. American Sammy may have closed up shop, but as a going-away present they left Battle Blaze, a sort of medieval fantasy street-fighting game. Acclaim has T2: Judgement Day in the line-up for Spring 1993 as well as the hit arcade football game from Williams, Super High Impact.
Coming up for the NES, look for Bomber Man II from Hudson Soft. The Bomber Man is a little guy who uses bombs to evade and destroy his enemies in maze-like rooms. The challenge is not to blow yourself up in the process. Goal 2 from Jaleco is a strong entry in the sports category if you're looking for a new soccer game. If you'd rather get into some heroic action, there's Eon Man from Taito, Bartman from Acclaim, Young Indy from Jaleco and Accolade's Terminator, based on the original movie. If you're feeling like a puzzle, Tecmo's Fire 'N Ice is a great sequel to the brain-bending Solomon's Key for the NES.

The first few months of the new year look extraordinarily good for Game Boy releases. Capcom alone is promising Darkwing Duck, The Little Mermaid, Tale Spin, and The Empire Strikes Back. Acclaim, not to be outdone, will be releasing Alien 3, T2 The Arcade Game and Krusty's Fun House. Robin Hood: Prince of Thieves is scheduled from Virgin Games, while Great Greed from Namco and Rampart from Jaleco both look good.

The news from Kemco is that Ace Harding: Lost in Las Vegas for the NES will be delayed at least until Spring while the English translation gets some professional polish. The same fate is being met by Kemco's long-awaited Sword of Hope 2 for Game Boy. American Technos, the makers of Street Challenge, are working on an entire series of games starring Crash and the Boys. Ice Challenge is due out this winter, with tentative plans for it to be followed by other sports titles. Among the many games Sony Imagesoft is working on are Extra Innings II, Dracula (for the NES as well as Super NES), and Son of Chuck (Chuck Rock 2).
CYBERNATOR
In a futuristic battle zone, Konami’s powerful Cybernator is the only hope for mankind. The awesome graphics and control may remind action fans of Contra III, but it’s an all new challenge.

The Addams Family

PUGSLEY’S SCAVENGER HUNT
The second Super NES Addams Family game from Ocean will be offered for your appraisal next month. The action is based on the new TV cartoon with Pugsley at your disposal! Another winner!

DARKWING DUCK
It’s time to get dangerous again! Capcom’s unflappable hero has flown the NES coop and landed on Game Boy. Good graphics and great action sequences abound in this crime-fighting title.

ZEN: INTERGALACTIC NINJA
Meet the newest ninja hero on the block. Zen. We’ll check out his mastery of the ninja arts next month when we review Konami’s latest NES offering.
Have you finished the game yet? Maybe you have, but do you know everything about it? Our new Player's Guide gives you all of the important information about A Link To The Past. You'll get much more than just straight game play information. It goes as far as educating the reader about the history of the Hyrulian culture. This is a must-have book for all Zelda fans!
Nintendo gives you the power to choose:

- Classic power.
- Portable power.
- Super power.

Any way you play, you’ll win with Nintendo—three times over.
Our goal is to try and preserve classic videogame magazines from years gone by before they are lost forever.

Thanks goes out to all the people who make this possible. From the original editors and writers, to everyone involved in acquiring and digitizing these magazines.

People interested in helping us out, in whatever way possible. Either by donating classic magazines, scanning, editing or distributing them, visit us at http://www.retromags.com

We are only interested in preserving classic magazines that are at least 5 years out of print.

We have no desire or intention to profit from these in any way. So please, if you come across people trying to sell these releases, don't support them!

Thank You and ENJOY!
